## Admissions

Welcome to the MIET admission page your gateway to a prestigious education. Here, you'll find all the information you need to begin your journey with us. When you apply to MIET, you'll have the opportunity to explore courses across various programs, crossing disciplines and shaping your own unique academic path. We understand that the application process can be challenging. Choosing the right undergraduate or graduate program is a significant decision, and our admissions team is here to guide you every step of the way. Let us help you navigate this critical journey and make a choice that will shape your intellectual and creative potential in profound ways.

UNDER GRADUATE, POST GRADUATE & DOCTORAL PROGRAMS

STUDENTS ON CAMPUS

of graduates had two or more internships as students

### Under Graduate Programs

#### Computer Science & Engineering

Empowering students with technical expertise, problem-solving skills, and innovation in software development, AI, cybersecurity, and emerging technologies for a dynamic tech-driven future.

- Engineering Course

#### CSE - Cyber Security

Cyber security protects digital assets from cyber threats, ensuring data confidentiality, integrity, and availability through proactive defense measures and education.

- Engineering Course

#### CSE - Artificial Intelligence & Machine Learning

AI and ML drive innovation by enabling machines to learn from data, automate processes, and enhance decision-making across industries, revolutionizing business operations and improving efficiency.

- Engineering Course

#### Civil Engineering

Civil engineering designs, builds, and maintains infrastructure projects, including roads, bridges, buildings, and water systems, ensuring safety and sustainability.

- Engineering Courses

#### Electrical Engineering

Electrical engineering focuses on designing, developing, and maintaining electrical systems, powering everything from homes to industrial machinery and technology.

- Engineering Course

#### Electronics & Communications Engineering

Electronics and Communication Engineering designs devices and systems, enabling seamless connectivity and advanced technology solutions worldwide.

- Engineering Courses

#### BBA (Hons.)

Join MIET's Hons. programs in BBA and experience a curriculum that focuses on practical skills and hands-on training with tools such as Uipath, Tally, Primavera and more.

- Management Courses

#### BBA - BFSI (Hons.)

MIET's School of Management is the perfect launchpad for a successful career in BFSI/FMCG/IT sector. Our curriculum is designed to meet the demands of the industry and provide students with the right knowledge and skills to succeed.

- Management Course

#### B.Com (Hons.)

MIET's Hons. programs in B.Com offer specializations in IT, Commerce, Law, Economics, and Management, designed to provide students with a competitive edge in the industry. Join now and experience the difference.

- Commerce Course

#### BAJMC (Hons.)

Join MIET's Hons. program in BA (Hons.) of Journalism and Mass Communication and gain hands-on training with industry-focused media tools, digital platforms, and real-world newsroom practices.

- Management Courses

#### BBA-LLB (Hons.)

MIET BBA Hons. program focuses on providing students with a strong foundation in business management principles and practices. Graduates can pursue careers in a variety of fields, including marketing, finance, human resources, operations management, and more.

- Law Courses

#### LLB (Hons.)

Our 3-Year LLB (Hons.) program is approved by the Bar Council of India and offers specializations in Cyber Laws, IT Laws, Intellectual Property Laws, Alternative Dispute Resolution Laws and many more. Our program focuses on hands-on legal experience with Moot Courts, Court Visits, Lectures by Judges and Advocates and organizing Legal Aid Clinics.

- Law Course

#### BCA (Hons.) Artificial Intelligence & Machine Learning

BCA (Hons.) offers an in-depth study of computer applications, programming, and software development, preparing students for tech industry careers.

- Computer Applications Courses

### Post Graduate Programs

#### MBA

Our MBA program is designed to be transformational, providing you with the skills and knowledge needed to achieve your career goals. Whether you're interested in Marketing, Finance, IT, or Operations, MIET's MBA program has something to offer.

- Management Courses

#### MCA

The MCA program builds a strong foundation in software development, emerging technologies, and problem-solving, preparing students for success in the ever-evolving IT industry.

- Computer Applications Course

#### M.Tech

Our M.Tech in CSE empowers you with advanced skills in AI, Machine Learning, Data Science, and Cybersecurity. With a strong focus on research and hands-on learning, the program prepares you for impactful roles in industry and academia.

- Engineering Course

#### Program Fees

We are committed to transparency in our fee structure to ensure accessibility and clarity for all students. Please refer to our official website or contact our admissions office for detailed information on tuition fees, payment schedules, and financial aid options.

#### B.Tech (CSE,AI/ML, CS,EE, ECE, CE)

- Annual Fee ■1,14,550/-

#### M.Tech

- Annual Fee ■85,500/-

## Are you ready to take the next step toward your career?

## How To Apply - Model Institute Of Engineering And Technology

Source: https://mietjmu.in/admission_miet/how-to-apply/ | Crawled: 2026-10-09T14:09:47.810911+00:00

## How To Apply

## Admission Process - 2026

#### 01

#### Registration Form

Complete the online application form with accurate academic and personal details in about 10 minutes.

#### 02

#### Registration Fee

After submitting your application and payment, the MIET Admissions Team will confirm receipt via phone or email within two working days

#### 03

#### Application Review

Once you've completed your application and connected with an admissions representative, you're ready to create your schedule.

#### 04

#### Payment of Fees

Upon approval, verify your documents and complete the fee payment to confirm enrollment at MIET.

Eligibility

#### B.Tech Requirements

- 50% and above in 12th Class with Physics, Chemistry, and Mathematics.
- Any State or National Level Entrance Exam (JEE Mains, JKCET) or MIET Entrance Test
- Must possess a domicile certificate

#### M.Tech Requirements

- Bachelor's Degree in a relevant engineering discipline (preferably CSE/IT/ECE)
- Minimum 50% aggregate marks
- Must appear for GATE or the MIET Entrance Exam
- Must possess a domicile certificate

#### BBA (Hons.) Requirements

- 50% and above in 12th Class or equivalent.
- Any State or National Level Entrance Exam – CUET-UG, or MIET Entrance Test.
- Must possess a domicile certificate

#### MBA Requirements

- Bachelor's Degree in any discipline from recognized university.
- Minimum 50% aggregate marks
- Must appear for CAT/MAT/CMAT or the University/ MIET Entrance Exam

#### BBA BFSI (Hons.) Requirements

- 50% and above in 12th Class or equivalent in any stream (preferably Commerce/Mathematics).
- Any State or National Level Entrance Exam – CUET-UG, or MIET Entrance Test.
- Must possess a domicile certificate

#### B.Com (Hons.) Requirements

- 50% and above in 12th Class or equivalent in any stream (preferably Commerce/Mathematics).
- Any State or National Level Entrance Exam – CUET-UG, or MIET Entrance Test.
- Must possess a domicile certificate

#### BCA (Hons.) Requirements

- 50% and above in 12th Class with Mathematics/Statistics/Computer Science/Information Practices or equivalent.
- Any State or National Level Entrance Exam (JEE Mains, JKCET)
- Must possess a domicile certificate

#### MCA Requirements

- Bachelor’s Degree in any discipline from a recognized university.

- Must have studied Maths at the 10+2 level or Graduation

- Minimum 50% aggregate marks

- Must possess a domicile certificate

#### BBA LLB (Hons.) Requirements

- 50% and above in 12th Class.

- Any State or National Level Entrance Exam (CUET, CLAT) or MET (MIET Entrance Test)

#### LLB (Hons.) Requirements

- Must have completed a Bachelor’s degree in any discipline.

- Minimum 50% aggregate marks

- Any State or National Level Entrance Exam (CUET, CLAT) or MET (MIET Entrance Test)

#### BA (Hons.) JMC Requirements

- 50% and above in 12th Class.

- Any State or National Level Entrance Exam (CUET) or MET (MIET Entrance Test)

Document Checklist

Original and photocopies of the following documents:

- 10th & 12th marksheets

- Graduation marksheet (Only for MBA / MCA / M.Tech / LLB (Hons.))

- Also bring a printout of the scorecard of CAT / MAT / any other entrance exam taken

- Provisional Certificate, Character Certificate, and Migration Certificate (for all students)

- Domicile Certificate (compulsory for Engineering courses)

- One photograph each of both parents (Mother & Father) and two photographs of the student

- Aadhar card and photocopy of both parents (Mother & Father) and the student

- Printout of Application Form and Acknowledgement of MIET Registration Form

- Printout of JKCET Application Form and Receipt / Acknowledgement (only for students who applied through JKCET)

- 03 affidavits attested by any Notary (Court / Tehsil) with e-stamping

- Resume for interaction and interview purpose (only for students appearing in CUET, MIET Entrance Test, and MBA + Interview)

- Medical Fitness Certificate

- GAP Certificate (if applicable)

All photocopies must be self-attested.

Note:-

- Please arrive in Professional/Formal Dress.

- Payment mode (for uniform fee):- Online or Credit/Debit card only.

## Are you ready to take the next step toward your career?

## Program Outcomes - Model Institute Of Engineering And Technology

Source: https://mietjmu.in/admission_miet/programoutcomes/ | Crawled: 2026-10-09T14:09:47.810911+00:00

## Program Outcomes & Objectives

## Overview

At MIET, our academic programs are designed to ensure that students are equipped with the knowledge, skills, and attitudes necessary to succeed in a dynamic global environment. The Program Outcomes (POs), which describe the broad competencies all students are expected to achieve, and the Program Specific Outcomes (PSOs), which define the specialized skills and knowledge students gain in their chosen discipline, are aligned with national and international educational standards. These outcomes ensure that graduates meet the core competencies expected upon successful completion of their degree.

The tuition fee at Model Institute of Engineering and Technology (MIET), Jammu, is considered reasonable compared to other private engineering colleges in India. MIET offers various undergraduate and postgraduate programs in engineering,

management, and computer applications, with a fee structure that balances affordability with quality education.

The institute provides value for money with modern infrastructure, experienced faculty, and industry-oriented training. Additionally, students can avail themselves of scholarships and financial aid based on merit and category reservations, making education more accessible.

- School of Technology

- School of Management

- School of Computer Applications

- School of Law

### Program Outcomes (POs) – B.Tech Computer Science Engineering

#### PO1 – Engineering Knowledge

Apply knowledge of mathematics, natural science, computing, engineering fundamentals and an engineering specialization as specified in WK1 to WK4 respectively to develop to the solution of complex engineering problems.

#### PO2 – Problem Analysis

Identify, formulate, review research literature and analyze complex engineering problems reaching substantiated conclusions with consideration for sustainable development. (WK1 to WK4)

#### PO3 – Design/Development of Solutions

Design creative solutions for complex engineering problems and design/develop systems/components/processes to meet identified needs with consideration for the public health and safety, whole-life cost, net zero carbon, culture, society and environment as required. (WK5)

#### PO4 – Conduct Investigations of Complex Problems

Conduct investigations of complex engineering problems using research-based knowledge including design of experiments, modelling, analysis & interpretation of data to provide valid conclusions. (WK8).

#### PO5 – Engineering Tool Usage

Create, select and apply appropriate techniques, resources and modern engineering & IT tools, including prediction and modelling recognizing their limitations to solve complex engineering problems. (WK2 and WK6)

#### PO6 – The Engineer and The World

Analyze and evaluate societal and environmental aspects while solving complex engineering problems for its impact on sustainability with reference to economy, health, safety, legal framework, culture and environment. (WK1, WK5, and WK7).

#### PO7 – Ethics

Apply ethical principles and commit to professional ethics, human values, diversity and inclusion; adhere to national & international laws. (WK9)

#### PO8 – Individual and Collaborative Team work

Function effectively as an individual, and as a member or leader in diverse/multi-disciplinary teams.

#### PO9 – Communication

Communicate effectively and inclusively within the engineering community and society at large, such as being able to comprehend and write effective reports and design documentation, make effective presentations considering cultural, language, and learning differences.

#### PO10 – Project Management and Finance

Apply knowledge and understanding of engineering management principles and economic decision-making and apply these to one’s own work, as a member and leader in a team, and to manage projects and in multidisciplinary environments.

#### PO11 – Life-Long Learning

Recognize the need for, and have the preparation and ability for i) independent and life-long learning ii) adaptability to new and emerging technologies and iii) critical thinking in the broadest context of technological change. (WK8)

### Program Specific Outcomes (PSOs) – B.Tech Computer Science Engineering

#### PSO1 – Demonstrate Fundamental Knowledge of Domains in Vogue

Demonstrate strong foundational knowledge in programming, data structures, databases, networks, operating systems, software engineering, discrete mathematics, and possess knowledge of emerging technologies such as cloud computing, big data, artificial intelligence, and other contemporary fields.

#### PSO2 – Demonstrate Competence in Designing and Implementing Software Systems

Design, implement, and test computer/software systems that solve real-world problems by effectively utilizing advanced technologies, platforms, and tools.

### Program Outcomes (POs) – B.Tech CSE (Artificial Intelligence & Machine Learning)

#### PO1 – Engineering Knowledge

Apply knowledge of mathematics, natural science, computing, engineering fundamentals and an engineering specialization as specified in WK1 to WK4 respectively to develop to the solution of complex engineering problems.

#### PO2 – Problem Analysis

Identify, formulate, review research literature and analyze complex engineering problems reaching substantiated conclusions with consideration for sustainable development. (WK1 to WK4)

#### PO3 – Design/Development of Solutions

Design creative solutions for complex engineering problems and design/develop systems/components/processes to meet identified needs with consideration for the public health and safety, whole-life cost, net zero carbon, culture, society and environment as required. (WK5)

#### PO4 – Conduct Investigations of Complex Problems

Conduct investigations of complex engineering problems using research-based knowledge including design of experiments, modelling, analysis & interpretation of data to provide valid conclusions. (WK8).

#### PO5 – Engineering Tool Usage

Create, select and apply appropriate techniques, resources and modern engineering & IT tools, including prediction and modelling recognizing their limitations to solve complex engineering problems. (WK2 and WK6)

#### PO6 – The Engineer and The World

Analyze and evaluate societal and environmental aspects while solving complex engineering problems for its impact on sustainability with reference to economy, health, safety, legal framework, culture and environment. (WK1, WK5, and WK7).

#### PO7 – Ethics

Apply ethical principles and commit to professional ethics, human values, diversity and inclusion; adhere to national & international laws. (WK9)

#### PO8 – Individual and Collaborative Team work

Function effectively as an individual, and as a member or leader in diverse/multi-disciplinary teams.

#### PO9 – Communication

Communicate effectively and inclusively within the engineering community and society at large, such as being able to comprehend and write effective reports and design documentation, make effective presentations considering cultural, language, and learning differences.

#### PO10 – Project Management and Finance

Apply knowledge and understanding of engineering management principles and economic decision-making and apply these to one’s own work, as a member and leader in a team, and to manage projects and in multidisciplinary environments.

#### PO11 – Life-Long Learning

Recognize the need for, and have the preparation and ability for i) independent and life-long learning ii) adaptability to new and emerging technologies and iii) critical thinking in the broadest context of technological change. (WK8)

### Program Specific Outcomes (PSOs) – B.Tech CSE (Artificial Intelligence & Machine Learning)

#### PSO1

Demonstrate fundamental knowledge in programming, data structures, databases, networks, operating systems, software engineering, discrete mathematics and possess knowledge of cloud computing, big data, artificial intelligence and other domains in vogue.

#### PSO2

Demonstrate competence in designing, implementing and testing a computer or software system, solving a real-world problem, by utilizing advanced technologies, platforms and tools.

### Program Outcomes (POs) – B.Tech CSE (Cyber Security)

#### PO1 – Engineering Knowledge

Apply knowledge of mathematics, natural science, computing, engineering fundamentals and an engineering specialization as specified in WK1 to WK4 respectively to develop to the solution of complex engineering problems.

#### PO2 – Problem Analysis

Identify, formulate, review research literature and analyze complex engineering problems reaching substantiated conclusions with consideration for sustainable development. (WK1 to WK4)

#### PO3 – Design/Development of Solutions

Design creative solutions for complex engineering problems and design/develop systems/components/processes to meet identified needs with consideration for the public health and safety, whole-life cost, net zero carbon, culture, society and environment as required. (WK5)

#### PO4 – Conduct Investigations of Complex Problems

Conduct investigations of complex engineering problems using research-based knowledge including design of experiments, modelling, analysis & interpretation of data to provide valid conclusions. (WK8).

#### PO5 – Engineering Tool Usage

Create, select and apply appropriate techniques, resources and modern engineering & IT tools, including prediction and modelling recognizing their limitations to solve complex engineering problems. (WK2 and WK6)

#### PO6 – The Engineer and The World

Analyze and evaluate societal and environmental aspects while solving complex engineering problems for its impact on sustainability with reference to economy, health, safety, legal framework, culture and environment. (WK1, WK5, and WK7).

#### PO7 – Ethics

Apply ethical principles and commit to professional ethics, human values, diversity and inclusion; adhere to national & international laws. (WK9)

#### PO8 – Individual and Collaborative Team work

Function effectively as an individual, and as a member or leader in diverse/multi-disciplinary teams.

#### PO9 – Communication

Communicate effectively and inclusively within the engineering community and society at large, such as being able to comprehend and write effective reports and design documentation, make effective presentations considering cultural, language, and learning differences.

#### PO10 – Project Management and Finance

Apply knowledge and understanding of engineering management principles and economic decision-making and apply these to one’s own work, as a member and leader in a team, and to manage projects and in multidisciplinary environments.

#### PO11 – Life-Long Learning

Recognize the need for, and have the preparation and ability for i) independent and life-long learning ii) adaptability to new and emerging technologies and iii) critical thinking in the broadest context of technological change. (WK8)

### Program Specific Outcomes (PSOs) – B.Tech CSE (Cyber Security)

#### PSO1

Demonstrate fundamental knowledge in programming, data structures, databases, networks, operating systems, software engineering, discrete mathematics and possess knowledge of cloud computing, big data, artificial intelligence and other domains in vogue.

#### PSO2

Demonstrate competence in designing, implementing and testing a computer or software system, solving a real-world problem, by utilizing advanced technologies, platforms and tools.

### Program Outcomes (POs) – B.Tech Civil Engineering

#### PO1 – Engineering Knowledge

Apply knowledge of mathematics, natural science, computing, engineering fundamentals and an engineering specialization as specified in WK1 to WK4 respectively to develop to the solution of complex engineering problems.

#### PO2 – Problem Analysis

Identify, formulate, review research literature and analyze complex engineering problems reaching substantiated conclusions with consideration for sustainable development. (WK1 to WK4)

#### PO3 – Design/Development of Solutions

Design creative solutions for complex engineering problems and design/develop systems/components/processes to meet identified needs with consideration for the public health and safety, whole-life cost, net zero carbon, culture, society and environment as required. (WK5)

#### PO4 – Conduct Investigations of Complex Problems

Conduct investigations of complex engineering problems using research-based knowledge including design of experiments, modelling, analysis & interpretation of data to provide valid conclusions. (WK8).

#### PO5 – Engineering Tool Usage

Create, select and apply appropriate techniques, resources and modern engineering & IT tools, including prediction and modelling recognizing their limitations to solve complex engineering problems. (WK2 and WK6)

#### PO6 – The Engineer and The World

Analyze and evaluate societal and environmental aspects while solving complex engineering problems for its impact on sustainability with reference to economy, health, safety, legal framework, culture and environment. (WK1, WK5, and WK7).

#### PO7 – Ethics

Apply ethical principles and commit to professional ethics, human values, diversity and inclusion; adhere to national & international laws. (WK9)

#### PO8 – Individual and Collaborative Team work

Function effectively as an individual, and as a member or leader in diverse/multi-disciplinary teams.

#### PO9 – Communication

Communicate effectively and inclusively within the engineering community and society at large, such as being able to comprehend and write effective reports and design documentation, make effective presentations considering cultural, language, and learning differences.

#### PO10 – Project Management and Finance

Apply knowledge and understanding of engineering management principles and economic decision-making and apply these to one's own work, as a member and leader in a team, and to manage projects and in multidisciplinary environments.

#### PO11 – Life-Long Learning

Recognize the need for, and have the preparation and ability for i) independent and life-long learning ii) adaptability to new and emerging technologies and iii) critical thinking in the broadest context of technological change. (WK8)

### Program Specific Outcomes (PSOs) – B.Tech Civil Engineering

#### PSO1

Graduates will be able to handle practical problems related to design, construction and maintenance of Civil Engineering structures. Demonstrates that the students will be able to solve problems related to the analysis and design of structures utilizing different concepts of design as specified in different Civil Engineering domains and will also be able to retrofit the existing structures.

#### PSO2

Graduates will be able to attain professional skills in various core areas of Concrete, Structural, Environmental and Transportation Engineering etc. Demonstrates that the students after graduation will achieve professional skills in different domains of Civil Engineering by going through various engineering and construction domains like Structures, Concrete, Environmental Engineering and Transportation Engineering respectively.

### Program Outcomes (POs) – B.Tech Electronics & Communication Engineering

#### PO1 – Engineering Knowledge

Apply knowledge of mathematics, natural science, computing, engineering fundamentals and an engineering specialization as specified in WK1 to WK4 respectively to develop to the solution of complex engineering problems.

#### PO2 – Problem Analysis

Identify, formulate, review research literature and analyze complex engineering problems reaching substantiated conclusions with consideration for sustainable development. (WK1 to WK4)

#### PO3 – Design/Development of Solutions

Design creative solutions for complex engineering problems and design/develop systems/components/processes to meet identified needs with consideration for the public health and safety, whole-life cost, net zero carbon, culture, society and environment as required. (WK5)

#### PO4 – Conduct Investigations of Complex Problems

Conduct investigations of complex engineering problems using research-based knowledge including design of experiments, modelling, analysis & interpretation of data to provide valid conclusions. (WK8).

#### PO5 – Engineering Tool Usage

Create, select and apply appropriate techniques, resources and modern engineering & IT tools, including prediction and modelling recognizing their limitations to solve complex engineering problems. (WK2 and WK6)

#### PO6 – The Engineer and The World

Analyze and evaluate societal and environmental aspects while solving complex engineering problems for its impact on sustainability with reference to economy, health, safety, legal framework, culture and environment. (WK1, WK5, and WK7).

#### PO7 – Ethics

Apply ethical principles and commit to professional ethics, human values, diversity and inclusion; adhere to national & international laws. (WK9)

#### PO8 – Individual and Collaborative Team work

Function effectively as an individual, and as a member or leader in diverse/multi-disciplinary teams.

#### PO9 – Communication

Communicate effectively and inclusively within the engineering community and society at large, such as being able to comprehend and write effective reports and design documentation, make effective presentations considering cultural, language, and learning differences.

#### PO10 – Project Management and Finance

Apply knowledge and understanding of engineering management principles and economic decision-making and apply these to one's own work, as a member and leader in a team, and to manage projects and in multidisciplinary environments.

#### PO11 – Life-Long Learning

Recognize the need for, and have the preparation and ability for i) independent and life-long learning ii) adaptability to new and emerging technologies and iii) critical thinking in the broadest context of technological change. (WK8)

### Program Specific Outcomes (PSOs) – B.Tech Electronics & Communication Engineering

#### PSO1

Demonstrate competence in designing, implementing and testing an electronics-based system, solving a real-world problem, by utilizing advanced technologies, platforms and tools.

#### PSO2

Demonstrate fundamental knowledge in digital electronics, communication/networking, embedded systems, automation, semiconductor technology, and other sub-domains in vogue.

### Program Outcomes (POs) – B.Tech Electrical Engineering

#### PO1 – Engineering Knowledge

Apply knowledge of mathematics, natural science, computing, engineering fundamentals and an engineering specialization as specified in WK1 to WK4 respectively to develop to the solution of complex engineering problems.

#### PO2 – Problem Analysis

Identify, formulate, review research literature and analyze complex engineering problems reaching substantiated conclusions with consideration for sustainable development. (WK1 to WK4)

#### PO3 – Design/Development of Solutions

Design creative solutions for complex engineering problems and design/develop systems/components/processes to meet identified needs with consideration for the public health and safety, whole-life cost, net zero carbon, culture, society and environment as required. (WK5)

#### PO4 – Conduct Investigations of Complex Problems

Conduct investigations of complex engineering problems using research-based knowledge including design of experiments, modelling, analysis & interpretation of data to provide valid conclusions. (WK8).

#### PO5 – Engineering Tool Usage

Create, select and apply appropriate techniques, resources and modern engineering & IT tools, including prediction and modelling recognizing their limitations to solve complex engineering problems. (WK2 and WK6)

#### PO6 – The Engineer and The World

Analyze and evaluate societal and environmental aspects while solving complex engineering problems for its impact on sustainability with reference to economy, health, safety, legal framework, culture and environment. (WK1, WK5, and WK7).

#### PO7 – Ethics

Apply ethical principles and commit to professional ethics, human values, diversity and inclusion; adhere to national & international laws. (WK9)

#### PO8 – Individual and Collaborative Team work

Function effectively as an individual, and as a member or leader in diverse/multi-disciplinary teams.

#### PO9 – Communication

Communicate effectively and inclusively within the engineering community and society at large, such as being able to comprehend and write effective reports and design documentation, make effective presentations considering cultural, language, and learning differences.

#### PO10 – Project Management and Finance

Apply knowledge and understanding of engineering management principles and economic decision-making and apply these to one's own work, as a member and leader in a team, and to manage projects and in multidisciplinary environments.

#### PO11 – Life-Long Learning

Recognize the need for, and have the preparation and ability for i) independent and life-long learning ii) adaptability to new and emerging technologies and iii) critical thinking in the broadest context of technological change. (WK8)

### Program Specific Outcomes (PSOs) – B.Tech Electrical Engineering

#### PSO1

Demonstrate fundamental knowledge in electrical circuits, power systems, power electronics, electrical and electronics measurement, control systems, and understand the need for renewable energy systems for developing clean energy and their applications in industry.

#### PSO2

Demonstrate competence in analyzing, designing and implementing industry-relevant electrical systems and provide electrical solutions for real-world problems in a multi-disciplinary environment.

### Program Outcomes (POs) – Bachelor of Business Administration

#### PO1 – Core Business Knowledge

Apply the knowledge of business administration, management skills, and tools acquired in the program, which will be helpful to bring the organizations' effectiveness.

#### PO2 – Career Planning and Decision Making

Identify and excel in their chosen career paths; and be able to emerge as efficient managers equipped with innovation, rationality, and application-oriented decision-making in the context of the ever-changing business environment.

#### PO3 – Critical Thinking and Leadership

Able to reflect upon and explore business and research problems in depth, to demonstrate leadership skills and to demonstrate ability to pursue new knowledge necessary to succeed in dynamic domestic and international business environments.

#### PO4 – Team Building and Communication

Communicate effectively and perform different roles efficiently as an individual or in a team in multi-disciplinary streams with entrepreneurial edge.

#### PO5 – Application of Statistical and Analytical Tools

Apply the knowledge of contemporary issues and develop an art of using latest techniques, skills, and necessary analytical tools for managerial practices.

#### PO6 – Lifelong Learning

Recognize the need for and have the preparation and ability to engage in independent and lifelong learning in the broader context of technological change.

### Program Outcomes (POs) – BBA-BFSI

#### PO1 – Core Business Knowledge

Apply the knowledge of business administration, management skills, and tools acquired in the program, which will be helpful to bring the organization's effectiveness.

#### PO2 – Career Planning and Decision Making

Identify and excel in their chosen career paths, and be able to emerge as efficient managers equipped with innovation, rationality, and application-oriented decision-making in the context of the ever-changing business environment.

#### PO3 – Critical Thinking and Leadership

Able to reflect upon and explore business and research problems in depth, to demonstrate leadership skills and to demonstrate the ability to pursue new knowledge necessary to succeed in dynamic domestic and international business environments.

#### PO4 – Team Building and Communication

Communicate effectively and perform different roles efficiently as an individual or in a team in multi-disciplinary streams with an entrepreneurial edge.

#### PO5 – Application of Statistical and Analytical Tools

Apply the knowledge of contemporary issues and develop an art of using the latest techniques, skills, and necessary analytical tools for managerial practices.

#### PO6 – Lifelong Learning

Recognize the need for and have the preparation and ability to engage in independent and lifelong learning in the broader context of technological change.

### Program Outcomes (POs) – Bachelor of Commerce

#### PO1 – Core Business Knowledge

Apply the knowledge of business administration, management skills, and tools acquired in the program, which will be helpful in bringing the organizations' effectiveness.

#### PO2 – Career Planning and Decision Making

Identify and excel in their chosen career paths and be able to emerge as efficient managers equipped with innovation, rationality, and application-oriented decision-making in the context of the ever-changing business environment.

#### PO3 – Critical Thinking and Leadership

Able to reflect upon and explore business and research problems in-depth, demonstrate leadership skills, and demonstrate the ability to pursue new knowledge necessary to succeed in dynamic domestic and international business environments.

#### PO4 – Team Building and Communication

Communicate effectively and perform different roles efficiently as an individual or in a team in multi-disciplinary streams with an entrepreneurial edge.

#### PO5 – Application of Statistical and Analytical Tools

Apply the knowledge of contemporary issues and develop an art of using latest techniques, skills, and necessary analytical tools for managerial practices.

#### PO6 – Life-long Learning

Recognize the need for and have the preparation and ability to engage in independent and lifelong learning in the broader context of technological change.

### Program Outcomes (POs) – Master of Business Administration

#### PO1 – Management Theories

Apply knowledge of management theories and practices to solve business problems.

#### PO2 – Analytical and Critical Thinking

Foster analytical and critical thinking abilities for data-based decision making.

#### PO3 – Value Based Leadership

Ability to develop value-based leadership skills.

#### PO4 – Ethical Aspect of Business

Ability to understand, analyze, and communicate global, economic, legal and ethical aspects of business.

#### PO5 – Team Building

Ability to lead themselves and others in the achievement of goals, contributing effectively to the team environment.

### Program Outcomes (POs) – Bachelor of Computer Applications (Hons)

#### PO1 – Foundation Knowledge

Apply knowledge of mathematics, programming logic and coding fundamentals for solution architecture and problem solving.

#### PO2 – Problem Analysis

Identify, review, formulate and analyse problems primarily focusing on customer requirements using critical thinking frameworks.

#### PO3 – Development of Solutions

Design, develop and investigate problems with an innovative approach for solutions incorporating ESG/SDG goals.

#### PO4 – Modern Tool Usage

Select, adapt and apply modern computational tools such as development of algorithms with an understanding of the limitations including human biases.

#### PO5 – Individual and Teamwork

Function and communicate effectively as an individual or a team leader in diverse and multidisciplinary groups. Use methodologies such as agile.

#### PO6 – Project Management and Finance

Use the principles of project management such as scheduling, work breakdown structure and be conversant with the principles of Finance for profitable project management.

#### PO7 – Ethics

Commit to professional ethics in managing software projects with financial aspects. Learn to use new technologies for cyber security and insulate customers from malware.

#### PO8 – Life-long Learning

Change management skills and the ability to learn, keep up with contemporary technologies and ways of working.

### Program Specific Outcomes (PSOs) – Bachelor of Computer Applications (Hons)

#### PSO1

Ability to understand and apply knowledge on analysis, design and development of software applications.

#### PSO2

Utilize skills and knowledge for computing practice with commitment to social, ethical and legal values.

#### PSO3

Ability to work with latest computing technologies and pursue careers in IT industry/consultancy/research and development, teaching and allied areas.

### Program Outcomes (POs) – Master of Computer Applications

#### PO1 – Foundation Knowledge

Apply knowledge of mathematics, programming logic and coding fundamentals for solution architecture and problem solving.

#### PO2 – Problem Analysis

Identify, review, formulate and analyse problems primarily focusing on customer requirements using critical thinking frameworks.

#### PO3 – Development of Solutions

Design, develop and investigate problems with an innovative approach for solutions incorporating ESG/SDG goals.

#### PO4 – Modern Tool Usage

Select, adapt and apply modern computational tools such as development of algorithms with an understanding of the limitations including human biases.

#### PO5 – Individual and Teamwork

Function and communicate effectively as an individual or a team leader in diverse and multidisciplinary groups. Use methodologies such as agile.

#### PO6 – Project Management and Finance

Use the principles of project management such as scheduling, work breakdown structure and be conversant with the principles of Finance for profitable project management.

#### PO7 – Ethics

Commit to professional eth

## Scholarship - Model Institute Of Engineering And Technology

## Scholarships

## Process

#### 01

#### Scholarship Options

Prospective students are encouraged to engage with our Admission Counselors during the admission process to explore available scholarship opportunities.

#### 02

#### Submit Documents

Applicants must provide all necessary scholarship-related documents during the admission process to complete their application.

#### 03

#### Scholarship Cheque

Upon successful admission and thorough document verification, MIET will issue the scholarship amount to eligible students via cheque.

### Types Of Scholarship

### Merit Scholarship

Bestowed upon students who have shown remarkable academic excellence

### Single Girl Child Scholarship

### Sports Scholarship

MIET offers scholarships for excellence in sports and academics.

### Beyond Scholarships: Building Careers and Future Success

Our state-of-the-art campus facilities, advanced research labs, innovation centres, and career-oriented programs further enhance the student experience. We also offer career counselling, placement assistance, and soft skills training, ensuring that students develop not just technical knowledge but also essential interpersonal and leadership skills.

At MIET, we are committed to holistic student development, empowering graduates to become skilled professionals, confident leaders, and responsible global citizens, ready to excel in their chosen fields. We emphasize critical thinking, innovation, and problem-solving to prepare students for real-world challenges. Through industry collaborations and hands-on learning, we bridge the gap between academics and practical application. Our focus on ethics, leadership, and lifelong learning ensures students contribute meaningfully to society.

## Fee Structure - Model Institute Of Engineering And Technology

Source: https://mietjmu.in/admission_miet/tuition-fees/ | Crawled: 2026-10-09T14:09:47.810911+00:00

## Fee Structure

The tuition fee at Model Institute of Engineering and Technology (MIET), Jammu is considered reasonable compared to other private engineering colleges in India. MIET offers various undergraduate and postgraduate programs in engineering, management, and computer applications, with a fee structure that balances affordability with quality education.

The institute provides value for money with modern infrastructure, experienced faculty, and industry-oriented training. Additionally, students can avail themselves of scholarships and financial aid based on merit and category reservations, making education more accessible.

## Apply for 2026

The application process can be challenging. Choosing the right undergraduate or graduate program is a significant decision, and our admissions team is here to guide you every step of the way. Let us help you navigate this critical journey and make a choice that will shape your intellectual and creative potential in profound ways.

## How To Apply

## Admission Process - 2026

#### 01

#### Registration Form

Complete the online application form with accurate academic and personal details in about 10 minutes.

#### 02

#### Registration Fee

After submitting your application and payment, the MIET Admissions Team will confirm receipt via phone or email within two working days

#### 03

#### Application Review

Once you've completed your application and connected with an admissions representative, you're ready to create your schedule.

#### 04

#### Payment of Fees

Upon approval, verify your documents and complete the fee payment to confirm enrollment at MIET.

Eligibility

#### B.Tech Requirements

- 50% and above in 12th Class with Physics, Chemistry, and Mathematics.
- Any State or National Level Entrance Exam (JEE Mains, JKCET) or MIET Entrance Test
- Must possess a domicile certificate

#### M.Tech Requirements

- Bachelor's Degree in a relevant engineering discipline (preferably CSE/IT/ECE)
- Minimum 50% aggregate marks
- Must appear for GATE or the MIET Entrance Exam
- Must possess a domicile certificate

#### BBA (Hons.) Requirements

- 50% and above in 12th Class or equivalent.
- Any State or National Level Entrance Exam – CUET-UG, or MIET Entrance Test.
- Must possess a domicile certificate

#### MBA Requirements

- Bachelor's Degree in any discipline from recognized university.
- Minimum 50% aggregate marks
- Must appear for CAT/MAT/CMAT or the University/ MIET Entrance Exam

#### BBA BFSI (Hons.) Requirements

- 50% and above in 12th Class or equivalent in any stream (preferably Commerce/Mathematics).
- Any State or National Level Entrance Exam – CUET-UG, or MIET Entrance Test.
- Must possess a domicile certificate

#### B.Com (Hons.) Requirements

- 50% and above in 12th Class or equivalent in any stream (preferably Commerce/Mathematics).
- Any State or National Level Entrance Exam – CUET-UG, or MIET Entrance Test.
- Must possess a domicile certificate

#### BCA (Hons.) Requirements

- 50% and above in 12th Class with Mathematics/Statistics/Computer Science/Information Practices or equivalent.
- Any State or National Level Entrance Exam (JEE Mains, JKCET)

- Must possess a domicile certificate

#### MCA Requirements

- Bachelor’s Degree in any discipline from a recognized university.
- Must have studied Maths at the 10+2 level or Graduation
- Minimum 50% aggregate marks
- Must possess a domicile certificate

#### BBA LLB (Hons.) Requirements

- 50% and above in 12th Class.
- Any State or National Level Entrance Exam (CUET, CLAT) or MET (MIET Entrance Test)

#### LLB (Hons.) Requirements

- Must have completed a Bachelor’s degree in any discipline.
- Minimum 50% aggregate marks
- Any State or National Level Entrance Exam (CUET, CLAT) or MET (MIET Entrance Test)

#### BA (Hons.) JMC Requirements

- 50% and above in 12th Class.
- Any State or National Level Entrance Exam (CUET) or MET (MIET Entrance Test)

Document Checklist

Original and photocopies of the following documents:

- 10th & 12th marksheets
- Graduation marksheet (Only for MBA / MCA / M.Tech / LLB (Hons.))
- Also bring a printout of the scorecard of CAT / MAT / any other entrance exam taken
- Provisional Certificate, Character Certificate, and Migration Certificate (for all students)
- Domicile Certificate (compulsory for Engineering courses)
- One photograph each of both parents (Mother & Father) and two photographs of the student
- Aadhar card and photocopy of both parents (Mother & Father) and the student
- Printout of Application Form and Acknowledgement of MIET Registration Form
- Printout of JKCET Application Form and Receipt / Acknowledgement (only for students who applied through JKCET)
