Bachelor of Computer Applications (Hons.) AI&ML

About the Program

- 4 Years

- 60 Seats

The BCA (Hons.) AI&ML program at MIET is purposefully designed to go beyond traditional computer education—shaping future-ready professionals equipped to drive digital transformation across industries. With a curriculum rooted in core computing concepts and enriched with emerging technologies such as artificial intelligence, cloud computing, data science, and cybersecurity, the program nurtures well-rounded tech leaders of tomorrow.

What distinguishes MIET's BCA (Hons.) AI&ML program is its forward-thinking structure, offering students the opportunity to specialize in cutting-edge domains while mastering foundational skills in programming, databases, networks, and software engineering. The academic experience is further elevated through hands-on learning, live projects, industry-grade certifications, and exposure to tools and platforms that dominate today's tech landscape.

Integrated internships, active mentorship from alumni and industry experts, and a strong placement ecosystem ensure that students graduate not just with a degree, but with a competitive edge. At MIET, the BCA (Hons.)AI&ML journey is not just about coding—it's about creating innovators, problem-solvers, and tech leaders who are prepared to excel in an ever-evolving digital world.

Bachelor of Computer Applications (Hons.) AI&ML

MIET's BCA (Hons.) AI & ML program is a future-driven, four-year undergraduate degree aligned with the NEP 2020 framework, designed to nurture next-gen tech professionals with strong academic and industry foundations. With the flexibility to opt for research or non-research tracks in the final year , the program empowers students to align their academic journey with career goals—whether in industry, entrepreneurship, or higher education.

Drive the digital future with a BCA in Artificial Intelligence Cybersecurity Cloud Computing Full Stack Development

Prepare to lead with confidence in a fast-evolving global economy through MIET's cutting-edge BCA program. Our curriculum integrates advanced business knowledge with experiential learning, strategic thinking, and industry engagement. With specializations in key domains and opportunities for cross-functional exposure, you'll develop the leadership agility and analytical skills to excel in diverse business roles and dynamic environments.

Placements

Whether you aspire to build a tech career, launch your startup, or pursue research and higher studies, MIET's BCA (Hons.) equips you with the skills, mindset, and global credentials to succeed in the evolving digital world.

- Software Developer

- Web Developer

- System Analyst

- Database Administrator

- Mobile App Developer

- IT Support Specialist

- UI/UX Designer

- Data Analyst

- QA/Test Engineer

- Network Administrator

- DevOps Engineer

- Tech Support Associate

Our Prominent Recruiters

Internships

At MIET, internships are a vital part of the BCA (Hons.) program, aimed at providing students with real-world industry exposure and practical experience. Through structured internships in leading IT companies and startups, students apply their technical skills in live environments, work on real-time projects, and build valuable professional connections within the tech ecosystem.

2nd Semester

Community orientation, early work exposure, and development of empathy and problem-solving in real-world settings.

4th Semester

Application of core computing skills in programming, data management, cybersecurity, or cloud computing; hands-on learning through real-world tech projects and structured industry internships.

6th Semester

Deeper functional exposure through an in-depth project in a chosen sector, helping students align academic learning with career interests.

8th Semester

In the final semester, students pursue an advanced internship through a capstone project, research assignment, or strategic industry role aligned with their career or higher education goals.

Program Highlights

Our 4-year BCA (Hons.) program is fully aligned with the National Education Policy (NEP 2020) and offers students a flexible, future-focused educational journey. After completing the three-year BCA degree, students can choose to continue for an additional year to earn an Honours qualification—with or without a research focus.

〉 3 Years – BCA Degree (120 Credits) ■ Graduate with a comprehensive BCA degree and be job-ready for IT roles or eligible for PG programs like MCA, MSc CS, etc.

〉 4 Years – Expand Your Career Horizon ■ BCA (Hons.) – Pursue advanced electives in high-demand areas like AI, Cybersecurity, and Cloud Computing. ■ BCA (Hons. with Research) – Undertake a research project or dissertation under expert mentorship, ideal for students aiming for higher studies, research careers, or global education opportunities.

Eligibility

- 50% marks and above in 12th Class.

- Any State or National Level Entrance Exam (CUET) or MET (MIET Entrance Test)

Future-Proof Your Career with Next-Gen Skills.

Digital Marketing & Data Analytics Certifications

Social Media Marketing Specialization

IT Minors in collaboration with CISCO Networking academy

IT Minors in collaboration with Google Cloud

Unlimited access to top global courses during the 4th year

Master Office 365 tools suchas Power BI to boost digital productivity and workplace readiness.

Manya Didwal

BBA

I’m incredibly thankful to MIET for shaping my journey and helping me secure a placement. The guidance, training, and industry exposure made all the difference. Proud to be a part of the BBA program here!”

FAQs

What is the duration of the BCA (Hons.) AI&ML program?

The BCA (Hons.) program is a four-year undergraduate degree aligned with NEP 2020. Students can also exit at earlier stages with a certificate, diploma, or standard BCA degree.

What are the specialization areas offered under BCA (Hons.) AI&ML?

Students can specialise in high-demand areas such as Artificial Intelligence & Machine Learning, Cybersecurity, Cloud Computing, and Full Stack Web Development.

Does the program include internships?

Yes, internships are a core component of the BCA (Hons.) program. Students gain hands-on experience through structured internships in IT companies and startups.

What kind of industry certifications can students pursue?

The curriculum integrates certification training for platforms like Microsoft Azure, AWS, Google, CEH (Cybersecurity), Oracle, and Cisco.

What career opportunities are available after BCA (Hons.) AI&ML?

Graduates can pursue roles such as Software Developer, Web Developer, Data Analyst, Cloud Engineer, Cybersecurity Analyst, or opt for higher studies like MCA, MSc CS, or global education paths.

BJMC Course - Model Institute Of Engineering And Technology

Source: https://mietjmu.in/bjmc-course/ | Crawled: 2026-10-09T14:09:47.810911+00:00

BA (Hons.) in Journalism & Mass Communication

About the Program

- 3+1 Years

- 120 Seats

The four-year BA(Hons.) JMC program at MIET is thoughtfully designed to go beyond traditional media education. It equips students with the creativity, technical expertise, and critical perspective needed to thrive in the fast-evolving world of journalism, communication, and digital media. With a future-oriented curriculum that blends core communication principles with emerging trends such as digital storytelling, media analytics, and content strategy, students gain a holistic understanding of the modern media ecosystem. The program also offers integrated industry-recognized certifications, allowing students to graduate with a competitive professional edge.

What sets MIET apart is its focus on hands-on learning and personalized growth—enabling students to explore their interests through specializations, production projects, internships, and real-world case studies. Combined with expert mentorship, experiential media labs, and strong placement support, MIET ensures that every graduate is not only industry-ready but also innovation-ready.

Whether your goal is to become a journalist, filmmaker, content creator, or communication strategist, MIET's BJMC (Hons.) program serves as the perfect launchpad for ambitious, forward-thinking storytellers and media leaders of tomorrow.

FAQs

What is the duration of the BA (Hons.) JMC program?

The program is offered as a 4-year undergraduate degree aligned with the NEP 2020 guidelines, with exit options after 3rd year.

What are the eligibility criteria for admission to the BA (Hons.) JMC program?

Applicants must have completed 10+2 (any stream) from a recognised board with at least 50% marks.

Does the program include internships or industry exposure?

Yes, the curriculum includes three mandatory internships (after 2nd, 4th, and 6th semesters) and a Capstone Project in the final year.

Is the BA (Hons.) JMC degree recognized nationally and internationally?

Yes, the program is UGC-recognized, NEP-aligned, and offered by an autonomous institution with NAAC 'A' Grade accreditation.

What kind of career opportunities are available after completing the BA (Hons.) JMC?

Graduates can pursue diverse roles in marketing, finance, HR, operations, and entrepreneurship . Those interested in further education can opt for an MBA, PGDM, or international master's programs .

What sets the BA (Hons.) JMC program at MIET apart from others?

The program offers a flexible, multidisciplinary structure, strong industry connections, internship-integrated learning, and a focus on 21st-century skills, ensuring students are career-ready and globally competitive.

Build the Future with B.Tech Civil Engineering at MIET

At MIET, the B.Tech in Civil Engineering is more than just a degree—it's a gateway to shaping the physical world around us. From highways and smart cities to eco-friendly buildings and sustainable infrastructure, this four-year program empowers students with the technical skills and innovative mindset to design, build, and manage complex civil projects.

The curriculum is aligned with the latest industry needs, integrating advanced tools like CAD, STAAD Pro, and GIS alongside core subjects. Students engage in live projects, on-site training, and industry internships that build real-world experience. Specialized tracks in areas such as structural engineering, environmental engineering, and construction management allow for focused learning.

What makes MIET unique is its emphasis on practical learning, personalized mentorship, and strong industry-academia collaboration. With access to modern labs, research opportunities, and placement support, students graduate ready to tackle tomorrow's engineering challenges—with confidence and purpose.

Whether your goal is to work with top engineering firms, contribute to nation-building, or pursue higher education, MIET's Civil Engineering program lays the foundation for a meaningful and impactful career.

Where Excellence Meets Recognition

Our program has earned national recognition from top-ranking agencies. These accolades highlight our commitment to academic excellence, industry-aligned curriculum, and holistic student development.

Bachelor of Technology - Civil Engineering

The B.Tech Civil Engineering program at MIET offers a future-focused, industry-aligned curriculum designed to develop skilled, innovation-driven engineers. Emphasizing practical learning, sustainable design, and exposure to advanced construction technologies, the program enables students to work on real-time infrastructure projects, gain certifications, and learn directly from industry professionals. Whether your goal is to contribute to nation-building, design smart infrastructure, or lead in the construction sector, MIET's Civil Engineering program equips you with the knowledge, tools, and hands-on experience to thrive in a rapidly evolving world.

Engineer the future with innovation-driven Civil Engineering at MIET

Prepare to shape the built environment with a future-ready B.Tech Civil Engineering program designed for tomorrow's infrastructure leaders. The curriculum integrates core engineering principles with hands-on training, fieldwork, and modern construction technologies. With opportunities to pursue specializations and interdisciplinary learning, students develop the skills and flexibility needed to succeed in evolving sectors like smart cities, green construction, and sustainable infrastructure. At MIET, you'll graduate not just as an engineer, but as an innovator ready to lead real-world transformation.

Computer Science & Engineering

About the Program

- 4 Years

- 180 Seats

The four-year B.Tech in Computer Science and Engineering (CSE) program at MIET is thoughtfully crafted to transcend conventional engineering education. It equips students with cutting-edge technical knowledge, problem-solving abilities, and the adaptive mindset required to excel in the ever-evolving tech landscape. The future-ready curriculum seamlessly integrates foundational computing concepts with emerging technologies such as Artificial Intelligence, Machine Learning, Cloud Computing, Cybersecurity, and Data Science.

What distinguishes MIET's CSE program is its strong emphasis on customized academic journeys —students can personalize their learning through focused tracks, hands-on capstone projects, research initiatives, and real-world industry collaborations. Industry-aligned certifications, hackathons, internships, and coding challenges further prepare students for success in a global digital economy.

Whether your aspiration is to innovate as a tech entrepreneur, work with global technology giants, or pursue higher research, MIET's B.Tech CSE program serves as the ideal launchpad for the next generation of innovative and impact-driven tech leaders.

Vision and Mission

Vision : To become a world-class department of computer science with demonstrated excellence in teaching, research and innovation. Mission : 1. To impart high-quality instruction in computer science, equipping students with fundamental knowledge and skills to address real-world challenges in emerging domains. 2. To integrate academics, research, innovation and entrepreneurship to create significant value for all stakeholders. 3. To develop meaningful linkages with world-class organizations to constantly enhance capacity and capability

Electronics & Communications Engineering

About the Program

- 4 Years

- 30 Seats

The four-year B.Tech program in Electronics and Communication Engineering (ECE) at MIET is meticulously crafted to go beyond conventional engineering education. It empowers students with the technical expertise, problem-solving skills, and innovative mindset needed to excel in a rapidly evolving tech landscape. With a future-focused curriculum that integrates core ECE principles with advancements in areas like embedded systems, IoT, AI, VLSI, and 5G communications, students gain a robust and relevant understanding of modern electronics and communication systems.

What distinguishes MIET's ECE program is its emphasis on hands-on learning and innovation. Students engage in industry projects, research, and design challenges that mirror real-world engineering problems. The program also includes access to cutting-edge labs, industry certifications, and strong mentorship—fostering both technical depth and practical experience.

Whether you aspire to innovate in the tech industry, pursue advanced research, or build your own product-driven startup, MIET's ECE program provides the ideal foundation for future-ready engineers and technology leaders.

Where Excellence Meets Recognition

Our program has earned national recognition from top-ranking agencies. These accolades highlight our commitment to academic excellence, industry-aligned curriculum, and holistic student development.

Bachelor of Technology - Electronics & Communications Engineering

The B.Tech ECE program at MIET is designed to bridge the gap between electronics, communication, and emerging technologies. With a future-ready, industry-aligned curriculum, the program focuses on core concepts, practical applications, and innovations in areas like IoT, VLSI, embedded systems, and wireless communication. Students work on real-world projects, earn globally relevant certifications, and benefit from mentorship by industry professionals. Whether you're aspiring to develop next-gen communication systems, contribute to smart technologies, or pursue research and entrepreneurship, MIET's ECE program equips you with the knowledge and hands-on experience to thrive in a tech-driven world.

Shape tomorrow's tech with B.Tech ECE at MIET

Prepare to innovate in a fast-evolving, tech-driven world with a cutting-edge B.Tech ECE program designed for tomorrow's engineers. Our curriculum combines solid foundations in electronics and communication with hands-on learning, real-world engineering projects, and flexible academic pathways. Electrical Engineering - Model Institute Of Engineering And Technology

Source: https://mietjmu.in/btech-ee/ | Crawled: 2026-10-09T14:09:47.810911+00:00

Electrical Engineering

About the Program

- 4 Years

- 30 Seats

The four-year B.Tech in Electrical Engineering (EE) program at MIET is designed to nurture innovation-driven engineers who are equipped to meet the evolving challenges of the energy and technology sectors. The curriculum strikes a balance between foundational electrical engineering concepts and emerging areas such as renewable energy systems, smart grids, electric mobility, and automation.

Students gain hands-on experience through lab work, industry internships, live projects, and exposure to advanced simulation and design tools. The program also integrates industry-recognized certifications and value-added courses that enhance technical proficiency and employability.

What distinguishes MIET is its emphasis on individualized learning pathways—students can choose electives, pursue interdisciplinary projects, and participate in real-world problem-solving experiences. With dedicated mentorship, strong industry collaborations, and robust placement support, MIET prepares graduates to become not just skilled engineers, but future-ready leaders in energy, innovation, and technology.

Whether you aim to work with leading energy firms, contribute to smart infrastructure, or pursue research and higher studies, MIET's EE program lays a solid foundation for a successful engineering career.

Where Excellence Meets Recognition

Our program has earned national recognition from top-ranking agencies. These accolades highlight our commitment to academic excellence, industry-aligned curriculum, and holistic student development.

Bachelor of Technology - Electrical Engineering

The B.Tech Electrical Engineering program at MIET delivers a forward-looking, application-driven curriculum designed to shape future-ready electrical engineers. With a strong foundation in core concepts and exposure to cutting-edge technologies like renewable energy, smart grids, electric vehicles, and automation, students gain hands-on experience through labs, industry projects, and internships. Globally recognized certifications, expert mentorship, and real-world learning ensure graduates are equipped to excel—whether in power systems, electronics, or sustainable energy innovation.

Power your future with B.Tech Electrical Engineering at MIET

Step into the future of smart energy and innovation with MIET's B.Tech Electrical Engineering program. Designed for the engineers of tomorrow, the curriculum integrates core electrical concepts with real-world applications in renewable energy, automation, and electric mobility. Engage in hands-on labs, industry-driven projects, and specialized tracks that prepare you to lead in a fast-evolving technological landscape.

Placements

Whether you're aiming to work with leading energy firms, contribute to smart infrastructure, launch innovative solutions in automation, or pursue advanced research and higher studies, MIET's B.Tech Electrical Engineering program equips you with deep technical expertise, a problem-solving mindset, and industry-relevant skills to thrive in the evolving world of electrical and energy technologies.

- Electrical Design Engineer
- Power System Engineer
- Maintenance Engineer
- Protection & Relay Testing Engineer
- Power Plant Engineer
- SCADA System Engineer
- ElEectrical Estimation Engineer
- Telecom Power Engineer
- Systems Analyst
- Compliance & Safety Officer (Electrical)
- IoT Developer
- Strategy Consultant

Our Prominent Recruiters

Internships

Internships are an integral part of the B.Tech Electrical Engineering experience at MIET. Students gain real-world exposure by interning with power plants, electrical utilities, manufacturing companies, and automation firms. These hands-on opportunities help students apply technical knowledge to live projects, understand industry practices, and build the skills needed for successful careers in the electrical and energy sectors.

2nd Semester

Community orientation, early work exposure, and development of empathy and problem-solving in real-world settings.

4th Semester

Application of core electrical engineering skills in power systems, automation, renewable energy, and control systems; hands-on learning through lab simulations, field training, and industry internships.

6th Semester

Deeper functional exposure through an in-depth project in a chosen sector, helping students align academic learning with career interests.

8th Semester

In the final semester, students pursue an advanced internship through a capstone project, research assignment, or strategic industry role aligned with their career or higher education goals.

Program Highlights

- Future-Ready Curriculum Aligned with AICTE guidelines and industry trends, covering core EE concepts and emerging areas like renewable energy, electric mobility, and smart grids.

Source: https://mietjmu.in/coursera-industry-linkage/ | Crawled: 2026-10-09T14:09:47.810911+00:00

Coursera

Overview

In an endeavour to strengthen the integration of academia with global industry-led digital learning platforms, MIET Jammu has established a strategic academic partnership with Coursera, a leading global online learning platform offering courses from top universities and industry leaders worldwide. This collaboration is aimed at enhancing digital learning capabilities, improving employability, and fostering future-ready skill development among students through access to globally recognized certification programs.

The partnership enables MIET to complement its academic curriculum with industry-relevant, technology-driven learning resources, supporting outcome-based education and aligning institutional learning objectives with current and emerging global industry requirements.

Programs Offered

Under this collaboration, MIET students gain access to a comprehensive portfolio of industry-aligned courses, professional certificates, and specialization programs curated by renowned international universities and leading technology companies. The programs span multiple high-demand domains including Artificial Intelligence, Machine Learning, Data Science, Cloud Computing, Cybersecurity, Software Development, Project Management, Digital Transformation, and other emerging technologies.

The Coursera platform facilitates a flexible, self-paced, and blended learning environment, allowing students to learn beyond classroom boundaries. The programs incorporate structured video lectures, interactive content, guided projects, hands-on assignments, simulations, and real-world case studies, ensuring both conceptual understanding and practical skill development aligned with industry standards.

Learning Outcomes

The primary objective of this collaboration is to bridge the gap between academic learning and industry expectations by equipping students with globally benchmarked skills and credentials. Through Coursera-enabled learning, students gain exposure to real-world industry practices, develop problem-solving and analytical skills, and earn industry-recognized digital certificates that add value to their academic profiles.

The partnership enhances students' employability, readiness for internships, higher education, and professional careers, while supporting continuous upskilling and lifelong learning. It also strengthens MIET's commitment to outcome-based education, digital transformation, and the development of industry-ready professionals capable of thriving in a competitive global workforce.

Master of Business Administration

About the Program

- 2 Years

- 60 Seats

The two-year MBA program at MIET is meticulously crafted to deliver more than just a management degree—it cultivates professionals who are ready to lead in a rapidly evolving business landscape. With a dynamic curriculum that integrates core management concepts with emerging trends such as digital innovation, data-driven decision-making, and organizational agility, the program prepares students to thrive in complex, technology-enabled environments.

What truly sets MIET's MBA apart is its dual-specialization model, allowing students to build expertise across functional domains such as Marketing, Finance, HR, Business Analytics, and Operations. This is complemented by cutting-edge value-added certifications, industry-relevant software training, and real-world projects that bridge the gap between theory and practice.

Through strong alumni networks, corporate mentorship, and a stellar placement record, MIET offers a launchpad for ambitious professionals aiming for high-impact roles across industries. With personalized mentorship, experiential learning, and continuous industry interaction, graduates leave not just job-ready—but future-ready.

Master of Business Administration (Hons.)

The MBA program at MIET delivers a dynamic, industry-focused curriculum tailored to shape visionary business leaders. With an emphasis on experiential learning, global perspectives, and domain specializations, students engage in real-time projects, industry certifications, and expert mentoring. Whether you aim to advance your career, drive innovation, or build your enterprise, MIET's MBA empowers you with the strategic insights and practical skills to lead confidently in a global business environment.

Where Excellence Meets Recognition

Our MBA program has received national recognition from leading ranking agencies, reflecting our unwavering commitment to academic excellence, industry-integrated learning, and the all-round development of future business leaders.

Lead the future of business with an MBA in Marketing Finance HR Management

Prepare to lead with confidence in a fast-evolving global economy through MIET's cutting-edge MBA program. Our curriculum integrates advanced business knowledge with experiential learning, strategic thinking, and industry engagement. With specializations in key domains and opportunities for cross-functional exposure, you'll develop the leadership agility and analytical skills to excel in diverse business roles and dynamic environments.

100% Placement Record – 10 Years in a Row

Whether you aspire to lead in the corporate world, launch your venture, or pursue research and higher studies, MIET's MBA program empowers you with the strategic mindset, professional skills, and global outlook needed to excel in any domain.

Our Prominent Recruiters

Internships

At MIET, internships form a core part of the MBA program, providing students with essential industry exposure and practical learning. Structured across semesters, the internship journey enables students to apply classroom concepts in real business environments, develop critical skills, and build valuable professional networks.

2nd Semester

A mandatory internship across sectors such as Banking & Finance, FMCG, IT, Consulting, E-commerce, and Manufacturing, where students gain hands-on experience and apply functional knowledge to real-world business challenges.

3rd Semester

Students engage in short-term live projects or consulting assignments with companies, enhancing their understanding of dynamic business environments while developing analytical and communication skills.

4th Semester

In the final semester, students undertake an extended internship, allowing them to explore specialised domains and contribute meaningfully to business outcomes. This experience often serves as a pathway to final placements.

Program Highlights

Our 2-year MBA program is structured in alignment with industry needs and academic excellence, offering students a transformative and future-ready management education. With an option to pursue advanced learning in the second year, students can tailor their MBA experience to align with their career aspirations

〉 1 Year – Foundation & Functional Expertise

■ Graduate with a full-fledged BBA degree and be career-ready or eligible for PG programs.

〉 2 Years – Advanced MBA Pathways

■ MBA (General) – Graduate with a full-spectrum management degree and dual specialisation for enhanced career opportunities. ■ MBA with Industry-Integrated Project – Work on a live industry project or case-based research, ideal for roles demanding problem-solving and analytical thinking. ■ MBA with Dissertation (Research Track) – Undertake a guided research project or dissertation, designed for students aspiring to pursue doctoral studies or research-intensive careers.

This flexible, outcome-oriented structure ensures that students graduate not only with academic credentials but also with real-world readiness and domain-specific depth.

Master of Computer Applications

About the Program

- 2 Years

- 60 Seats

The MCA program at MIET is crafted to empower graduates with advanced knowledge and practical skills that bridge the gap between theoretical computer science and real-world application. Rooted in a rigorous curriculum, the program emphasizes deep technical expertise in areas such as software development, machine learning, data analytics, cybersecurity, cloud computing, and full-stack development.

What sets MIET's MCA program apart is its blend of academic excellence and industry relevance. Students gain mastery over algorithms, system design, mobile and web technologies, and enterprise software solutions, while also engaging in interdisciplinary learning that sharpens their problem-solving and analytical abilities.

The program integrates live projects, hackathons, certification opportunities, and collaborative learning through innovation labs and research clusters. With strong industry linkages, mentorship from accomplished alumni, and structured internships, MIET ensures that MCA graduates emerge as confident professionals ready to lead digital transformation initiatives across sectors.

At MIET, the MCA journey is not just about becoming software professionals—it's about evolving into visionary technologists, architects of scalable systems, and agile innovators who can shape the future of the digital economy.

Master of Computer Applications (Hons.)

MIET's MCA program is a dynamic, two-year postgraduate degree designed to produce industry-ready computing professionals with advanced technical and problem-solving skills. Aligned with NEP 2020 and evolving digital trends, the program offers flexibility through specialization pathways and hands-on industry engagement, empowering students to pursue careers in software development, data science, cybersecurity, research, or entrepreneurship.

Build Smarter Careers with an MCA in Artificial Intelligence Cybersecurity Cloud Computing Full Stack Development

Prepare to innovate with impact in a rapidly evolving tech-driven world through MIET's advanced MCA program. Our curriculum blends deep computing knowledge with hands-on experience, critical problem-solving, and industry collaboration. With specialisations in high-demand domains and exposure to real-world projects, you'll build the technical expertise and adaptability required to thrive in diverse technology roles and drive digital transformation across sectors.

Placements

Whether you aim to advance your tech career, become an innovation leader, or pursue cutting-edge research, MIET's MCA program empowers you with advanced skills, industry-aligned expertise, and global credentials to excel in the ever-evolving digital landscape.

- Software Developer

- Web Developer

- DevOps Engineer

- Tech Support Associate

Our Prominent Recruiters

Internships

At MIET, internships form an integral part of the MCA program, offering students immersive industry exposure and hands-on experience. Through structured internships with top IT firms, product companies, and startups, MCA students apply advanced technical concepts in real-world settings, contribute to live projects, and gain valuable insights and networks that accelerate their professional growth in the tech industry.

2nd Semester

Students get early exposure to industry practices through workshops, minor projects, and interactions, helping bridge academic learning with real-world tech insights.

4th Semester

Students undertake full-time internships, applying advanced skills on live projects in leading tech firms—often leading to job offers and career breakthroughs.

Program Highlights

Our 2-year MCA program is designed in line with the National Education Policy (NEP 2020), offering a rigorous, industry-aligned pathway for graduates to gain advanced computing expertise. With a focus on specialization, flexibility, and career readiness, the program empowers students to thrive in high-growth technology roles or pursue further research and academic pursuits.

〉 2 Years – MCA Degree (80 Credits) Gain in-depth knowledge in core and advanced computing domains with hands-on project work, certifications, and industry exposure.

〉 Specialization Tracks Choose advanced electives in areas like Artificial Intelligence, Full Stack Development, Cloud Computing, Cybersecurity, and Data Science to align with your career goals.

〉 MCA with Research (Optional) Work on a guided research project or thesis in the final semester—ideal for students aiming for doctoral studies, R&D roles, or international education pathways.

FAQs

What is the duration and structure of the MCA program at MIET?

The MCA program is a 2-year postgraduate degree aligned with NEP 2020. It includes four semesters of classroom learning, hands-on labs, specializations, and a final semester internship or research project.

What are the eligibility criteria for admission to the MCA program?

Candidates must have a bachelor’s degree in Computer Applications, Computer Science, or a related discipline with Mathematics at 10+2 or graduation level, as per AICTE norms.

Does the MCA program offer any specializations?

Yes, students can choose from high-demand specialisations such as Artificial Intelligence, Data Science, Cloud Computing, Cybersecurity, and Full Stack Development.

Are internships a part of the MCA curriculum?

Absolutely. A full-time internship or research project is integrated into the final semester, allowing students to gain real-world experience and strengthen their career prospects.

What career opportunities are available after completing MCA at MIET?

Graduates can pursue roles such as Software Developer, Data Analyst, Cybersecurity Specialist, AI/ML Engineer, Cloud Architect, or continue with research and higher studies like Ph.D.

MIET Jammu Student Secures Prestigious Internship at IIT Bombay

- March 18, 2026

- Student Placement , Student Resources , Student Success , Uncategorized

The Model Institute of Engineering and Technology (MIET), Jammu, proudly congratulates Latika Sharma, a B.Tech Civil Engineering student, on securing a prestigious semester-long internship at the Indian Institute of Technology Bombay (IIT Bombay). This remarkable achievement reflects her academic excellence, dedication, and strong technical foundation.

Securing an internship at IIT Bombay, one of India's premier institutions, is a significant milestone that highlights both individual merit and the quality of education at MIET. Latika's accomplishment showcases her commitment to learning, innovation, and professional growth, while also emphasizing the institute's focus on nurturing industry-ready engineers.

MIET extends its heartfelt congratulations and best wishes to Latika Sharma as she embarks on this exciting academic and professional journey. Her success serves as an inspiration for fellow students to aim higher and make the most of the opportunities provided to them.

M.Tech CSE

About the Program

- 2 Years

- 09 Seats

The two-year M.Tech in Computer Science and Engineering program at MIET is meticulously crafted to prepare students for the rapidly evolving world of advanced computing and digital innovation. It goes far beyond conventional postgraduate education by offering a curriculum that is both deeply academic and sharply industry-focused.

With a forward-looking approach, the program blends core computing fundamentals with emerging technologies such as Artificial Intelligence & Deep Learning, Big Data, Cloud Computing, Internet of Things (IoT), and Software-Defined Networking (SDN). Students gain a robust understanding of cutting-edge technologies shaping the digital future.

What truly sets MIET's M.Tech CSE apart is its strong academic-industry integration.

Whether your ambition is to conduct impactful research, drive innovation in the tech industry, or pursue doctoral studies, MIET's M.Tech CSE program provides the ideal platform to lead, innovate, and excel in a data-driven world.

Where Excellence Meets Recognition

Our CSE program has earned national recognition from top-ranking agencies. These accolades highlight our commitment to academic excellence, industry-aligned curriculum, and holistic student development.

Master of Technology - Computer Science and Engineering

The M.Tech CSE program at MIET is designed for graduates seeking to deepen their expertise and lead in advanced computing fields. With a future-focused, research-intensive, and industry-driven curriculum, the program prepares students to solve complex technological challenges through innovation and applied learning.

Students specialize in cutting-edge areas such as Artificial Intelligence, Deep Learning, Big Data, Cloud Computing, IoT, and Software-Defined Networking, while working on real-world research projects and earning industry-recognized certifications. The program also offers mentorship from leading academicians and industry experts, along with exposure to IPR and patenting processes.

Whether your goal is to pursue a career in R&D, join top-tier technology companies, or continue into doctoral studies, MIET's M.Tech CSE program equips you with the advanced skills, insight, and experience to excel in the next frontier of computing.

Code your way to success with M.Tech CSE at MIET

Prepare to lead in a dynamic, data-driven world with a cutting-edge BBA program designed for tomorrow's professionals. Our curriculum blends strong business fundamentals with hands-on learning, real-world projects, and flexible academic pathways. With options to pursue minors and interdisciplinary combinations, you'll gain a competitive edge and the adaptability to thrive in any business environment.
