Academic Linkages

MIET offers global opportunities through collaborations with leading international institutions. Our MoU with the University of Florida provides certification programs, while the partnership with the University of Missouri–Kansas City offers special admissions and R&D benefits. The alliance with IIT Jammu introduces Minor Degree Specialisations in Transportation Engineering and Hydraulics & Water Resource Engineering.

Through the VFS Global–Austria STEM Initiative, in partnership with TU Wien, TU Graz, and TU Leoben, MIET enables students to pursue affordable, high-quality master's programs in Austria with global exposure and clear career pathways.

These initiatives empower MIET students with world-class education and international learning opportunities for success in a rapidly evolving world.

Apple Authorized Traning Centre - Model Institute Of Engineering And Technology

Source: https://mietjmu.in/apple-atc/ | Crawled: 2026-10-09T14:09:47.810911+00:00

Apple Authorized Training Centre

Overview

MIET has been recognised as an Apple Authorised Training Centre for Education (AATCe). This prestigious recognition allows us to offer unparalleled opportunities for our students by integrating Apple's Develop in Swift curriculum into our academic programs.

Unique Benefits for Students

Through this program, students will gain access to:

- Instructor-Led Training: Expert instruction from Apple-certified trainers.

- App Development Skills: Hands-on experience in developing applications on macOS and iOS platforms.

- Cutting-Edge Technology: Training sessions conducted in our state-of-the-art Apple Lab.

State-of-the-Art Apple Lab

Our Apple Lab is equipped with:

- 21 High-Performance iMacs: Ensuring smooth and efficient learning and development experiences.

- iPads and Apple TV: Providing additional tools and resources for an immersive educational experience.

As an AATCe, MIET is committed to delivering high-quality Apple certification training, ensuring our students are well-prepared for future technological demands. Join us to take advantage of this exceptional program and elevate your skills in app development with Apple's premier educational resources.

Centres Of Excellence - Model Institute Of Engineering And Technology

Source: https://mietjmu.in/centres-of-excellence/ | Crawled: 2026-10-09T14:09:47.810911+00:00

Centers of Excellence

Model Institute of Engineering and Technology (MIET) hosts multiple Centres of Excellence (CoEs) that drive cutting-edge research, innovation, and capacity-building across emerging and critical domains. Each centre serves as a hub for academic excellence, industry collaboration, and student skill development, aligning with national priorities and global standards.

Apple Authorized Training Centre

The Apple Lab at MIET is a cutting-edge facility dedicated to mobile application development within the Apple ecosystem. Equipped with high-end Mac systems and iOS devices, the lab provides students hands-on experience in building iOS apps using Swift and Xcode. It enables innovation in mobile technology, encouraging students to design, develop, and deploy user-centric apps for real-world impact.

Mitsubishi Electric India - Authorized Training Centre

The Mitsubishi Authorized Training Centre at MIET is a premier industrial automation facility established in collaboration with Mitsubishi Electric India. It provides hands-on training in PLC programming, SCADA systems, HMI, and factory automation technologies, aligned with global industry standards. The centre equips students with essential skills for Industry 4.0, enhancing their employability and technical expertise in automation.

UltraTech Centre of Excellence

The Ultratech Centre of Excellence at MIET is a specialized hub for advanced civil engineering and construction technology. Established in collaboration with Ultratech Cement, the centre promotes innovation in sustainable construction, materials testing, and structural analysis. It offers students exposure to industry best practices, hands-on workshops, and expert-led training on the latest trends in cement and concrete technology.

Oracle Academy

The Oracle Academy at MIET provides students with access to world-class curriculum and resources in database systems, Java programming, and cloud technologies. Through this global academic initiative, students gain hands-on experience with Oracle tools, industry-relevant certifications, and project-based learning, preparing them for successful careers in software development and data management.

IBM Centre of Excellence

The IBM Centre of Excellence at MIET is a premier academic-industry collaboration focused on emerging technologies like Artificial Intelligence, Data Science, Cloud Computing, and Cyber Security. It offers students access to IBM's cutting-edge tools, platforms, and certifications through the IBM SkillsBuild program. The centre empowers learners with industry-aligned training, real-world projects, and pathways to global tech careers.

Dr. Arun K Gupta - TLC at MIET

The Teaching Learning Centre (TLC) at MIET under the aegis of the Indo-Universal Collaboration for Engineering Education (IUCEE) empowers the faculty and students to strive for excellence based on a model of deep engagement and experimentation. Experts, mentors and TLC champions strive to create a platform for delivering an evolved and modern teaching, learning, evaluation and assessment experience. The TLC conducts a rich plethora of events and activities including training, skill and capacity building programs, content creation, induction and orientation programmes besides championing hybrid-learning, peer-tutoring and academic support, adoption of new pedagogies and technology and engaging in research around teaching-learning.

MIET – iACE Centre for Innovation and Career Excellence

The iACE Centre at MIET provides students with access to specialized programs, industry-driven certifications, and hands-on training in Electric Vehicle (EV) technologies. Through this collaboration with iACE, students gain practical experience, work on real-world projects, and develop future-ready skills in innovation, research, and sustainable mobility.

IIT Ropar – Cyber-Physical Systems (CPS) Lab

The CPS Lab at MIET, established with IIT Ropar, offers students hands-on learning in Cyber-Physical Systems (CPS), IoT, and AI. Through project-based research, workshops, and mentorship, students gain practical experience, industry-relevant skills, and opportunities to develop prototypes and startups in emerging technologies.

MIET – Centre for Drone Technologies

The Centre for Drone Technologies at MIET offers students specialized training, industry-oriented programs, and hands-on learning in Drone (UAV) technologies. Through this centre, students gain practical exposure to drone design, flight operations, aerial surveying, mapping, surveillance, and data analysis. Learners work on real-world projects and applications across sectors such as agriculture, infrastructure, disaster management, and smart cities, developing future-ready skills in innovation, automation, and advanced aerial systems.

CPS Lab - Model Institute Of Engineering And Technology

Source: https://mietjmu.in/cps-2/ | Crawled: 2026-10-09T14:09:47.810911+00:00

Cyber Physical Systems Laboratory (CPS Lab)

About the Partnership

The Cyber Physical Systems Laboratory (CPS Lab) is a specialised research and training facility focused on the integration of computation, networking, and physical processes—the technological foundation of Industry 4.0, smart manufacturing, IoT, and autonomous systems. This MOU establishes a formal collaboration between MIET Jammu's academic programmes and CPS Lab, creating shared infrastructure, research access, and skill development opportunities in embedded systems, hardware security, real-time systems, robotics, and machine learning. The partnership positions our students and faculty at the cutting edge of one of India's fastest-growing technology domains.

Benefits for Students

- Access to Specialised Lab Facilities: Students gain access to CPS Lab's hardware and software infrastructure for embedded systems, IoT prototyping, robotics, and sensor integration.

- Hands-On Industry Problem Solving: Students work on real industrial challenges in hardware security, embedded systems design, and cyber-physical integration.

- Project-Based Learning: The collaboration enables semester-long and capstone projects grounded in actual CPS applications across manufacturing, healthcare, and smart infrastructure.

- Skill Development in Emerging Technologies: Exposure to IoT, machine learning on edge devices, real-time operating systems, and hardware virtualisation—skills in high demand across technology sectors.

- Research Publication Opportunities: Outstanding students may co-author technical reports or publications arising from collaborative research projects.

CPS Lab - Model Institute Of Engineering And Technology

Source: https://mietjmu.in/cps/ | Crawled: 2026-10-09T14:09:47.810911+00:00

Cyber Physical Systems Laboratory (CPS) Lab

Overview

The CPS Lab at MIET, established in collaboration with IIT Ropar, serves as a cutting-edge hub for hands-on learning in Cyber-Physical Systems (CPS), Internet of Things (IoT), and Artificial Intelligence (AI). The lab provides students with a dynamic environment to engage in project-based research, interactive workshops, and expert mentorship. Here, learners acquire practical, industry-relevant skills while working on real-world problems, developing innovative prototypes, and exploring entrepreneurial opportunities. By fostering experimentation and collaboration, the CPS Lab empowers students to push the boundaries of technology and prepares them to lead in emerging fields and start-up ventures.

Unique Benefits for Students

Through this program, students gain exclusive access to a wide range of opportunities designed to nurture innovation and industry-ready skills:

- Hands-on experience with cutting-edge technologies: Work directly with advanced IoT devices, CPS frameworks, and AI tools to build practical solutions for real-world problems.

Hands-on experience with cutting-edge technologies: Work directly with advanced IoT devices, CPS frameworks, and AI tools to build practical solutions for real-world problems.

- Interdisciplinary learning: Engage in projects that integrate hardware, software, data analytics, and intelligent systems, providing a holistic understanding of complex technology ecosystems.

Interdisciplinary learning: Engage in projects that integrate hardware, software, data analytics, and intelligent systems, providing a holistic understanding of complex technology ecosystems.

- Expert mentorship and guidance: Receive personalized mentorship from IIT Ropar faculty and industry professionals, gaining insights into current trends, best practices, and career pathways.

Expert mentorship and guidance: Receive personalized mentorship from IIT Ropar faculty and industry professionals, gaining insights into current trends, best practices, and career pathways.

- Innovation and entrepreneurship opportunities: Collaborate in teams to conceptualize, design, and develop prototypes, with support to transform innovative ideas into startups or scalable projects.

Innovation and entrepreneurship opportunities: Collaborate in teams to conceptualize, design, and develop prototypes, with support to transform innovative ideas into startups or scalable projects.

- Research and knowledge-building: Participate in workshops, seminars, and research initiatives to stay at the forefront of emerging technologies.

Research and knowledge-building: Participate in workshops, seminars, and research initiatives to stay at the forefront of emerging technologies.

- Industry exposure and networking: Interact with professionals, attend tech events, and access resources that connect academic learning with real-world industry applications.

Industry exposure and networking: Interact with professionals, attend tech events, and access resources that connect academic learning with real-world industry applications.

State-of-the-Art CPS Lab

- Advanced Equipment: Features IoT sensor arrays, AI/ML workstations, prototyping tools, and embedded systems for designing, testing, and implementing real-world solutions.

Advanced Equipment: Features IoT sensor arrays, AI/ML workstations, prototyping tools, and embedded systems for designing, testing, and implementing real-world solutions.

- 24/7 Access: Provides round-the-clock plug-and-play access for continuous experimentation and innovation.

24/7 Access: Provides round-the-clock plug-and-play access for continuous experimentation and innovation.

- Comprehensive Setups: Includes data acquisition, robotics kits, SCADA interfaces, and real-time monitoring systems for hands-on learning in CPS, IoT, and AI.

Comprehensive Setups: Includes data acquisition, robotics kits, SCADA interfaces, and real-time monitoring systems for hands-on learning in CPS, IoT, and AI.

IBM Centre Of Excellence - Model Institute Of Engineering And Technology

Source: https://mietjmu.in/ibm-coe/ | Crawled: 2026-10-09T14:09:47.810911+00:00

IBM Centre of Excellence

Overview

The institution signed an MOU with IBM in 2009 to set up the first IBM Software Center of Excellence in the Northern region. Under this Center, students of MIET get free training and certification on leading technologies from IBM, besides placement support and participation in The Great Minds Challenge (TGMC), India's most prestigious project competition.

MIET Signs MoU with IBM, USA

Model Institute of Engineering and Technology has signed a Memorandum of Understanding (MoU) with IBM, USA, to provide its students with access to the Skill Build platform developed by IBM. The MoU was signed by Ms. Claudia Cortes Romanelli, Director, WW Geos & Markets, IBM Corporate Social Responsibility. This collaboration with IBM will enable MIET students to undertake high-quality courses in emerging technologies like Artificial Intelligence, Blockchain, Cloud Computing, and Cybersecurity. The Skill Build platform is designed to help students gain the skills they need to succeed in today's rapidly evolving job market. The platform provides students with an opportunity to learn from IBM experts and work on real-world projects.

Industrial Linkages

MIET collaborates with global industry leaders like IBM, Apple, and Mitsubishi Electric India, along with several other renowned companies, to offer students exceptional opportunities for growth. Through the IBM Software Center of Excellence, students gain free training, certification, placement support, and access to competitions. As an Apple Authorized Training Center for Education (AATCe), MIET integrates Apple's Develop in Swift curriculum, equipping students with in-demand skills. Additionally, the Mitsubishi Factory and Industrial Robotics Lab—the first of its kind in Jammu & Kashmir—provides hands-on training in industrial automation, PLC, HMI, and SCADA robotic programming, using advanced Mitsubishi Electric equipment. These collaborations ensure students are industry-ready and highly employable.

iACE (Innovation and Career Excellence

Overview

Model Institute of Engineering and Technology (MIET), Jammu, has collaborated with the International Automobile Center of Excellence (IACE) — a joint initiative of Maruti Suzuki India Ltd. and the Government of Gujarat — to establish a Center of Excellence in Electric Vehicles (EV).

This landmark initiative aims to strengthen India's electric mobility ecosystem by offering industry-integrated education, hands-on research, and certified training programs in EV design, manufacturing, and sustainability. The Centre will serve as a hub for innovation and skill development, preparing students for the future of green mobility and intelligent transportation systems.

Key Highlights of the Initiative

Specialised Minor Degree Programs in Electric Vehicles

MIET introduces industry-aligned minor degree programs focused on electric vehicle technology, design, and production, helping students gain expertise in one of India's fastest-growing engineering domains.

Cutting-edge Research and Innovation

The Centre promotes interdisciplinary research in EV technologies, covering battery management systems, charging infrastructure, electric drivetrains, and smart mobility solutions.

Certification Programs Aligned with NSQF Standards

Students can earn nationally recognised certifications that align with the National Skills Qualifications Framework (NSQF), enhancing employability and technical proficiency in the EV sector.

Industry-Focused Training and Upskilling

Through real-world projects, expert-led workshops, and hands-on labs, students gain practical exposure to EV manufacturing, testing, and diagnostics, bridging the gap between academia and industry.

Microcredits under the NCrF Framework

Flexible microcredit courses under the National Credit Framework (NCrF) enable learners to pursue continuous skill development and upskilling in emerging EV technologies.

E mpowering a Sustainable and Electric Future

The Centre of Excellence in Electric Vehicles at MIET aims to nurture innovation, entrepreneurship, and sustainability among students, aligning with India's vision for clean and green mobility. By integrating academic rigour with industry collaboration, MIET continues to empower future engineers and innovators to lead the transition toward electric and intelligent transportation.

Together with IACE and Maruti Suzuki India Ltd., MIET is committed to driving EV education, research, and industry partnerships — shaping a cleaner, smarter, and more connected future for India's mobility ecosystem.

About IACE

The International Automobile Centre of Excellence (IACE) is a state-of-the-art institution established by Maruti Suzuki India Ltd. in partnership with the Government of Gujarat. It focuses on advanced skill development, industry-certified programs, and innovation-driven training in the automobile and electric vehicle sectors, empowering India's next generation of mobility professionals.

Mitsubishi Authorized Training Centre - Model Institute Of Engineering And Technology

Source: https://mietjmu.in/mitsubishi-atc/ | Crawled: 2026-10-09T14:09:47.810911+00:00

Mitsubishi Authorized Training Centre

Overview

In the endeavour to bridge the gap between academia and industry MIET and Mitsubishi Electric India Private Limited, a global manufacturer of Electrical & Electronic equipment have established a FA Authorized Training Centre (ATC) at the Department of Electronics & Communication and Electrical Engineering, MIET with the cost of 2 Crores. The Mitsubishi Electric FA Lab is the first and exclusive industry-driven centre of excellence in the state of J&K in the domain of industrial automation. The Lab is set up with a specific mandate to create awareness and develop industry-relevant skills on the latest equipment and software. Under this collaboration, MEI has supplied high-end automation equipment with all accessories including high-end software for the simulation/programming of the equipment to MIET. The training equipment includes the Mitsubishi Electric iQ-R PLC-based FA training kit comprising HMI, VFD, Servo and FX PLC with HMI training kit iQ Platform software (engineering software) with simulation accessories. The objective of this ATC is to conduct an Industrial Training program on PLC, HMI, and SCADA robotic Programming courses on the advanced level of Industrial Automation to students from engineering.

Training Courses

Courses are designed to build skills in such a manner that upon completion of the course, the student will have the skills needed to design and implement new ideas and schemes in industrial automation. The course starts with basics of industrial automation systems, covering advance concept of hardware, software and architecture of modular automation system along with hands-on training sessions on PLC, sensors, GOT 2000 (HMI), Robotic Arm with Integrated Hydraulic, VFD, Servo Systems and SCADA in Industrial automation. It also covers Ladder Logic, functional blocks, input/output (I/O) ports and explains all basic, standard and custom functions and capabilities of a PLC, HMI, Robotic Systems, SCADA components involved in automation.

Training Outcomes

- Design and build PLC ladder programming on their personal computers.

- Design ladder logic, functional blocks and implementation in the GX Works3 environment.

- Design and build PLC logic in the domain of the automation field.

- Analyse and synthesise the problems with their solution with the help of various types of software for various PLC & automation components.

- Analyse the industrial problems and provide their solution.

- Familiarise with the concept of HMI and able to control the process using GOT2000 GT designer.

- Describe the working of servo systems and set up their communication with logic controllers.

- Use various Servo and PLC functions like master and slave mode control.

- Interface PLC to the other systems, like sensors and electrical actuators, conveyor systems, HMI, SCADA, and Robotic systems.

- Operate the SCADA system for monitoring and controlling purposes.

- Controls and operates the Robotic Arm.

Research - Model Institute Of Engineering And Technology

Source: https://mietjmu.in/research-development-cell/ | Crawled: 2026-10-09T14:09:47.810911+00:00

Research & Development Cell

Vision

To put in place a robust mechanism for developing and strengthening the research ecosystem within the Institute, aligned with the provisions of NEP-2020.

Mission

- To create a conducive environment for enhanced research productivity.

- To encourage collaboration across industry, government, community- based organizations, and agencies at the local, national, and international levels.

- To facilitate greater access to research through mobilization of resources and funding.

Objectives

- To create an organisational structure with role-based functions of RDC, formulate Research Policy, identify thrust areas of research, and form related cluster groups/ frontline teams/consortia of researchers.

- To create enabling provisions in Research Policies for recruitment of research personnel, procurement of equipment, and financial management with adequate autonomy to the Principal Investigator(s) and disseminate research outcomes to stakeholders and the public at large.

- To act as a liaison between researchers & relevant research funding agencies, extend guidance in preparation & submission of project proposals and post-sanctioning of the grants to oversee adherence to timelines.

- To have better coordination among other cells/centres dealing with Academia-Industry Inter Linkage, Incubation, Innovation and Entrepreneurship Development and Intellectual Property Rights (IPR).

- To develop an Institutional Research Information System for sharing the status of ongoing/ completed research projects/Programmes, expertise & resources, etc., making effective use of Information & Communication Technology (ICT) for preparing the database of in-house experts to provide industrial consultancy and services.

- To serve as a nodal centre for ideation and conceptualisation of research topics/themes by organising workshops and training programs, and ensuring the integrity and ethical practices in research activitie,s including clearance ofthe bioethical committee wherever required.

- To engage, utilise the services of superannuated active faculty/scientists in research capacity building of talented young minds and promote mobility of researchers across institutions and R&D Labs.

- To establish a special purpose vehicle to promote researchers and innovators, identify potential collaborators from industry, research organisations, academic institutions and other stakeholders for cooperation and synergistic partnership

Committee Structure

Centre for Research, Innovation & Entrepreneurship

- CRIE Website

Overview

The Center for Research, Innovation & Entrepreneurship (CRIE) at MIET was inaugurated on April 10, 2019, by Prof. Manoj K. Dhar, Vice Chancellor of the University of Jammu. This initiative offers students hands-on experience with real-world projects in emerging fields such as Artificial Intelligence, Deep Learning, IoT, Cloud Computing, and Robotic Process Automation. Operating on an internship-based model, selected students collaborate on projects under the guidance of expert faculty mentors, gaining practical skills, filing patents, and publishing research papers. It encourages interdisciplinary teamwork, bringing students from various departments together to innovate. Prof. Ankur Gupta, Director of MIET, leads as the Chief Mentor, supported by faculty mentors Prof. Sahil Sawhney, Dr. Suhaib Ahmed, and Mr. Karan Khajuria. Currently, more than 20 students are actively engaged in pioneering research and development through CRIE.

Facilities and Resources

CRIE is equipped with state-of-the-art facilities to support its initiatives. Students from Model Academy School and Activity Higher Secondary School have explored CRIE, witnessing firsthand how cutting-edge technologies are utilized in research and innovation.

Collaborations and Achievements

CRIE has established collaborations with industry partners and academic institutions to enhance its research capabilities and entrepreneurial support. The center has been instrumental in incubating IT products and filing patents, reflecting its commitment to innovation and practical application of research.

Objectives

- To promote innovation in applied AI technologies.

- To enhance education and awareness in AI across various fields.

- To collaborate with industries for AI-driven solutions.

- To conduct research in AI for societal betterment.

- To provide consultation and advice on AI applications.

Startups Summits

Jk Startup Conclave

The Jammu Kashmir Startup Conclave 2024, hosted by MIET in collaboration with FICCI FLO JKL on November 8th, celebrated the entrepreneurial spirit and innovation in the region. The event featured esteemed speakers, including industry leaders and senior government officials, who shared valuable insights on building and scaling startups. Early-stage startups received over Rs. 2.5 lakhs in funding, while the Elevator Pitch Competition attracted 500+ entries, showcasing exceptional talent and creativity. The conclave provided a dynamic platform for networking, mentorship, and collaboration, fostering growth, learning, and empowerment for aspiring entrepreneurs in Jammu and Kashmir.

SEED

The SEED (Startup Ecosystem for Entrepreneurial Development) initiative at MIET Jammu is a comprehensive program designed to foster innovation and support aspiring entrepreneurs. It provides mentorship from industry experts, access to venture capital, networking with investors, and collaboration opportunities. SEED also organizes workshops, seminars, and boot camps to equip startups with essential skills for growth and scalability. As a key part of MIET's mission, the initiative plays a vital role in promoting entrepreneurship, strengthening the local economy, and nurturing a thriving startup culture in the region.

UDAY

The UDAY Summit, organized by MIET Jammu, is a flagship event promoting entrepreneurship, innovation, and business growth. It unites entrepreneurs, industry leaders, investors, and academicians to explore startup opportunities. The summit features keynote speeches, panel discussions, startup pitching sessions, and workshops on strategy and funding. It also provides networking opportunities, connecting startups with mentors, experts, and government bodies. Through this initiative, MIET strengthens Jammu and Kashmir's startup ecosystem, empowering young innovators and driving economic and technological advancement.

Institution's Innovation Council - Model Institute Of Engineering And Technology

Source: https://mietjmu.in/research-development-cell/innovation-entrepreneurship-research/ | Crawled: 2026-10-09T14:09:47.810911+00:00

Institution's Innovation Council

Overview

The Institution's Innovation Council (IIC) at MIET plays a pivotal role in nurturing a culture of creativity and problem-solving by organizing hackathons, ideation challenges, startup incubation programs, and technical training sessions. Through strategic collaborations with industry leaders, research organizations, and government initiatives, IIC empowers students and faculty to transform ideas into viable solutions with real-world impact.

Vision

To promote grassroots innovation leading to the incubation of start-ups in the region

Mission

To develop an ecosystem of innovation and entrepreneurship at MIET with adequate infrastructure that can enable students and faculty to innovate, prototype and commercialise their potential ideas

Major Focus of IIC

- To create a vibrant local innovation ecosystem

- Start-up/ entrepreneurship supporting Mechanism in HEIs

- Establish Function Ecosystem for Scouting Ideas and Pre-incubation of Ideas

- Develop better Cognitive Ability amongst Technology Students

MIET Achieves Prestigious 4-Star Rating

MIET has been awarded a 4-star rating by the Innovation Cell, Ministry of Education (MoE), Govt. of India, for its outstanding efforts in promoting innovation and startups during the IIC Calendar Year 2023-24. Ranked among the top 200 institutions nationwide and the top 20 in North West India, MIET continues to foster a thriving ecosystem of creativity, research, and entrepreneurship. This achievement is a testament to the dedication and hard work of our faculty members and IIC team, who have consistently organized impactful innovative activities throughout the year.

Functions of IIC

- Promote innovation in the Institution through multitudinous modes leading to an innovation promotion eco – system in the campus.

- To conduct various innovation and entrepreneurship-related activities prescribed by Central MIC in time bounded fashion.

- Identify and reward innovations and share success stories.

- Organize periodic workshops/ seminars/ interactions with entrepreneurs, investors, professionals and create a mentor pool for student innovators.

- Network with peers and national entrepreneurship development organizations.

- Create an Institution’s Innovation portal to highlight innovative projects carried out by institution’s faculty and students.

- Organize Hackathons, idea competition, mini challenges etc., with the involvement of industries.

Research Publications

List of Research Papers Published

S.No Title Publication Indexed In Month Year

1 Shape stabilized phase change materials: Preparation techniques, emerging support matrices, artificial intelligence assisted optimization, and energy storage applications Journal of Energy Storage SCI/SCIE,SCOPUS,ESCI,UGC October 2026

2 A Blockchain-Assisted Fine-Grained Access Control Framework for AI-Native 6G Intelligent Internet of Medical Things IEEE Communications Standards Magazine SCOPUS,DBLP,UGC October 2026

3 Diffusion models for high-fidelity neuroimage generation and enhancement Generative Artificial Intelligence for Neuroimaging SCOPUS October 2026

4 Decoding the factors shaping Gen Z and millennial choices of electric two-wheeler in a developing market Case Studies on Transport Policy SCOPUS,ESCI,UGC September 2026

5 High-Performance Computing-Driven Defense Architecture Against Cross-Domain Cyber- Physical Attacks in Smart Power Grids High Performance Computing and Sustainability Through Artificial Intelligence UGC,SCOPUS September 2026

6 Artificial intelligence driven approaches for sustainable urban water management Sustainable Smart Water Systems SCOPUS September 2026

7 Smart sensors for water testing and quality assessment Sustainable Smart Water Systems SCOPUS September 2026

8 Artificial Intelligence-Enabled Supply Chain Risk Management and Its Impact on Project Cost Efficiency: An Empirical Investigation The Journal of theoretical Accounting research ABDC September 2026

9 INTELLIGENT HORIZONS: THE FUTURE OF AI IN EDUCATION, INDUSTRY, AND BEYOND UGC September 2026

10 Quantum Computing: A Short Discussion on Qubit Technologies and Implementations 2026 1st International Conference on Innovation & Growth in Next-Gen Intelligent Technology & Engineering (IGNITE) SCOPUS September 2026

11 Foraging energetics of Xylocopa fenestrata Fabricius and Xylocopa pubescens Spinola (Hymenoptera: Anthophoridae) Current Science SCI/SCIE,SCOPUS,UGC September 2026

12 Waqf Amendment Act 2025: A Critical Evaluation of State Accountability and Minority Rights under the Garb of Reformation. International Journal on Arts, Management and Humanities UGC August 2026

13 Teaching Law by Design: Applying Bloom’s Taxonomy to Cognitive and Affective Objectives in Legal Education UGC August 2026

14 Reclaiming collective memory: the consecration of Shree Ram Temple in Ayodhya and the Hindu cultural identity Global Knowledge, Memory and Communication SCOPUS,ESCI,UGC,ABDC July 2026

15 Accelerating the transition to sustainable electric mobility with barrier analysis and policy frameworks Next Energy SCOPUS,ESCI,UGC July 2026

16 From Digital Personas to Human Connections: Advancing Human-Centric Marketing Through Virtual Influencers Journal of Marketing & Social Research ABDC July 2026

17 Exploring Issues & Challenges of Deepfakes: A Doctrinal Study Artificial Intelligence and the Law: Global Perspectives, Regulatory Challenges, and Emerging Jurisprudence SCOPUS July 2026

18 Cloak before it’s fake: a comprehensive review of deepfake prevention and a novel conceptual cloaking framework Journal of Nonlinear, Complex and Data Science SCI/SCIE,SCOPUS,UGC July 2026

19 Fuzzy Logic Driven Self■Tuned PI Controller for Enhanced Speed Regulation of PMSM Drives Journal of Electrical and Computer Engineering SCOPUS,ESCI,UGC July 2026

20 Deepfakes and the Law AI in Forensic Science, Data Management and Law SCOPUS June 2026

21 Feature fusion deep learning approach for detection and grading assessment of cataracts from fundus images Discover Artificial Intelligence SCOPUS,UGC June 2026

22 THE ROLE OF ESG (ENVIRONMENTAL, SOCIAL, AND GOVERNANCE) FACTORS ON INVESTMENT DECISIONS: A STUDY ON INDIAN INVESTORS Asian And Pacific Economic Review June 2026

23 3D Concrete Printing of Structures: Mix Design with Partial Replacement of Sand with Raw Sewage Sludge Proceedings of the Conference on Bridging Engineering Disciplines with AI and Machine Learning (BEDAIML 2026) SCOPUS June 2026

24 Engaging Gen Z in STEM higher education: Faculty presence as a catalyst for classroom connection Innovations in Education and Teaching International SCOPUS,SSCI,UGC June 2026

25 Perceptions and attitudes towards artificial intelligence tools among Indian higher education students examined through a contextualised scale Discover Education SCOPUS,UGC June 2026

26 FSSL-TANet: A Federated Semi-Supervised Temporal Attention Network for Personalized Early Detection of Age-Related Macular Degeneration in Consumer Electronics IEEE Transactions on Consumer Electronics SCI/SCIE,SCOPUS,UGC June 2026

27 Towards durable and sustainable building power generation: Tuning oxygen vacancies and carrier mobility in La2-xBaxNiO4±■ nickelates for high-efficiency solid oxide fuel cells International Journal of Sustainable Building Technology and Urban Development SCOPUS,UGC June 2026

28 Customer Well-Being Through Customer Engagement: Examining Mobile Fitness Applications Through the Lens of Self-Determination Theory International Journal of Economic Perspectives UGC,ABDC June 2026

29 A Hybrid CAE–MOCNN Architecture for Efficient Multiple-Output Plant Species and Disease Classification Emerging Trends in Smart Computing and Sustainable Communication SCOPUS June 2026

30 A Blockchain-Enabled Framework to Ensure Transparency, Security and Equity in Educational Scholarships Emerging Trends in Smart Computing and Sustainable Communication SCOPUS June 2026

31 A secure encrypted CBIR and explainable hybrid deep learning framework for clothing recommendation Discover Applied Sciences SCOPUS,ESCI,UGC May 2026

32 Neuromorphic AI-Based e-Skin for Emotion-Sensitive Humanoid Robots Engineering Proceedings SCOPUS,UGC May 2026

33 Cross-Device Behavioral Fusion in Personal IoT for Early Stress Detection: A Blockchain-Enabled, Privacy-Preserving Architecture Next-Generation Computing and Information Systems SCOPUS May 2026

34 Next-Generation Computing and Information Systems SCOPUS May 2026

35 The Role of Employment in Environmental Degradation: Empirical Insights from Selected G20 Countries Indian Economic Journal SCOPUS,UGC,ABDC May 2026

36 Sustainability and Circular Economy Implications of Electric Mobility in Ecologically Sensitive Mountain Terrains of India: Evidence from Jammu & Kashmir and Ladakh Circular Economy and Sustainability SCOPUS,UGC May 2026

37 Energy Efficient Mono-Crystalline Solar Cell using blended dual layer as Anti-Reflective Coating 2026 International Conference on Intelligent Processing, Hardware, Electronics, and Radio Systems (CIPHER) SCOPUS May 2026

38 Machine Learning Framework for Diabetes Mellitus Classification Next-Generation Computing and Information Systems SCOPUS May 2026

39 Custom vs Managed Deployment Pipelines on AWS: A Comparative Study of Sustainability and Scalability Emerging Trends in Smart Computing and Sustainable Communication SCOPUS May 2026

40 Identity-Based Key-Insulated Multi-copy Provable Data Possession Scheme for Secure Multi-cloud Storage Communications in Computer and Information Science UGC,SCOPUS,DBLP,EI ENGINEERING INDEX May 2026

41 Low-cost AI-driven Footfall Monitoring System with Enhanced Detection Range for Smart City Applications 2026 IEEE Applied Sensing Conference (APSCON) SCOPUS May 2026

42 Lightweight Anomaly Detection Using TinyML Models on Simulated IoT Networks Next-Generation Computing and Information Systems SCOPUS May 2026

43 Leveraging the Machine Learning Models to Predict the Impact of Rising Electricity Bills and its Expense on Customers' Annual Disbursement Next-Generation Computing and Information Systems May 2026

44 A Privacy-Preserving Federated Meta-Learning Framework for Rare Disease Histopathology Next-Generation Computing and Information Systems SCOPUS May 2026

45 Introduction to artificial intelligence for environmental sustainability AI and Computational Intelligence for Environmental Sustainability SCOPUS May 2026

46 Deep Learning-Based Multichannel Model for Human Activity Recognition Technology from Wearable Devices Next-Generation Computing and Information Systems UGC,SCOPUS April 2026

47 Transforming academic libraries into GenAI-enabled libraries: proposing experience, evaluation and engagement (3Es) dimensions through UGT and TAM perspective Digital Library Perspectives SCOPUS,ESCI,UGC April 2026

48 IMPACT OF FINANCIAL LITERACY ON INVESTMENT BEHAVIOR: A META ANALYTIC REVIEW Asian And Pacific Economic Review ABDC April 2026

49 Performance Evaluation of Novel Framework for Efficient IoT Resource Allocation 2026 International Conference on Communication, Computing and Emerging Technologies (IC3ET) April 2026

50 An Explainable Machine Learning Based Clinical Decision Support Framework for Early Heart Disease Risk Stratification Innovations in Machine, Engineering, and Digital Conference (IMED) SCOPUS April 2026

51 Framework for Malware Detection in IoT Resource Allocation Advancements in IoT, Cyber Security and Cloud Computing SCOPUS,EI ENGINEERING INDEX April 2026

52 A privacy preserving optimized intelligent security framework for smart homes using zero trust architecture and explainability Scientific Reports SCI/SCIE,SCOPUS,UGC April 2026

53 Mach Zehnder Interferometer-Based Photonic Matrix Multiplication for AI Acceleration Devices Next-Generation Computing and Information Systems SCOPUS April 2026

54 Faculty attitudes and perceptions towards improving quality of research and innovation in Higher Education institutions in India Journal of Engineering Education Transformations SCOPUS,UGC April 2026

55 New and innovative methods and frameworks: Agritech 2.0 pioneering the future of smart agriculture Robotics and Intelligent Machines in Smart Agriculture SCOPUS April 2026

56 New architectures to enable a holistic approach toward sustainable and intelligent agriculture applications Robotics and Intelligent Machines in Smart Agriculture SCOPUS April 2026

57 LazyAI: Learning How and When Not to Act Next-Generation Computing and Information Systems SCOPUS April 2026

58 Heat stress indices of wheat (Triticum aestivum L.) varieties as affected by sowing dates and growth regulators under sub-tropical conditions of Jammu Plant Science Today SCOPUS,ESCI,UGC April 2026

59 Cancer Diagnosis Prediction Using Borderline-SMOTE Balanced RNA-Seq Data Next-Generation Computing and Information Systems SCOPUS April 2026

60 Post-Quantum Security for Fog Computing-Based IoT Systems Against Eavesdropping Attacks Next-Generation Computing and Information Systems UGC,SCOPUS April 2026

61 Deep Learning and Blockchain-Based Secure and Scalable Glaucoma Detection for Healthcare 4.0 2025 International Conference on Emerging Technologies in Electronics and Green Energy (ICETEG) SCOPUS April 2026

62 DANN-Based Harmonization of Multi-Center fMRI for ASD Classification using ABIDE I and II Next-Generation Computing and Information Systems SCOPUS April 2026

63 THE LIAR'S DIVIDEND AND DEEPFAKES: INTERNATIONAL AND INDIAN PERSPECTIVES Panjab University Law Review UGC April 2026

64 Reconfigurable Metasurface-Enabled AIoT Framework for Intelligent and Sustainable Smart Cities Engineering Proceedings SCOPUS,UGC March 2026

65 A Secure Blockchain-Driven Model for Identity Preservation and Missing Person Tracing in Post-Disaster Scenarios 2025 8th World Engineering Conference on Contemporary Technologies (WECON) SCOPUS March 2026

66 USDA-Unsupervised Domain Adaptive Prediction Model for Ischemic Stroke Assessment 2025 8th World Engineering Conference on Contemporary Technologies (WECON) SCOPUS March 2026

67 A Comparative Analysis of Deep Learning Approaches for Predicting Drug Target Interaction 2025 8th World Engineering Conference on Contemporary Technologies (WECON) SCOPUS March 2026

68 Lightweight QoS-Aware Workflow Scheduling for Efficient Task Execution in Cloud Environments 2025 8th World Engineering Conference on Contemporary Technologies (WECON) SCOPUS March 2026

69 Advancing Space Communication with Metallic Antenna Design for CubeSats and Small Spacecrafts 2026 IEEE International Conference on Interdisciplinary Approaches in Technology and Management for Social Innovation (IATMSI) March 2026

70 From Growth to Jobs: Empirical Inquiry into China's Employment Elasticity and Its Macroeconomic Drivers Statistika SCOPUS,ESCI,UGC March 2026

71 A Hybrid Machine Learning and Deep Learning Framework for Heart Disease Prediction 2026 World Conference on Computational Science and Technology (WcCST) SCOPUS March 2026

72 Predictive Analytics for Early Prediction of Alzheimer's Disease Using Machine Learning 2026 World Conference on Computational Science and Technology (WcCST) SCOPUS March 2026

73 AI-Driven Automation in Solanaceae Farming for Disease and Pest Management Artificial Intelligence and Sustainable Agriculture for Solanaceae Crops SCOPUS March 2026

74 A novel approach for breast tumor segmentation using multi-resolution analysis through wavelet transform Soft Computing SCI/SCIE,SCOPUS,UGC February 2026

75 Curated Learning Paths for faculty upskilling in STEM Disciplines: An Institutional Best Practice Journal of Engineering Education Transformations SCOPUS,UGC February 2026

76 Building critical system thinking capability in Engineering students: A case for long term tech internships in campus Journal of Engineering Education Transformations SCOPUS,UGC February 2026

77 A Transform-Based UNet Architecture for Breast Tumor Segmentation Journal of Signal Processing Systems SCI/SCIE,SCOPUS,UGC February 2026

78 Stability Analysis of Cylindrical Journal Bearing with Different Textured Surface Tribology in Industry SCOPUS,UGC February 2026

79 A Review on Opportunities in 6G and Beyond: Applications and Challenges Emerging Technology and Sustainable Solutions SCOPUS January 2026

80 Estimation of Noise Threshold of Pulse Sensor Signal Using Wavelet Transform Emerging Technology and Sustainable Solutions SCOPUS January 2026

81 Automated IoT Water Management System for Multi-story Buildings in Smart Cities Emerging Technology and Sustainable Solutions SCOPUS January 2026

82 Leveraging Custom GPTs to Enhance Teaching and Learning Quality in Engineering Education: A Case Study from a Teaching Learning Center in India 2025 IEEE International Conference on Teaching, Assessment, and Learning for Engineering (TALE) SCOPUS January 2026

83 Comparative Analysis of Water Soaking and Cement Coating Treatments for Crumb Rubber in Rigid Pavement as Fine Aggregate Replacement Trends & Recent Advances in Civil Engineering SCOPUS January 2026

84 Empathy Matters: Exploring Teacher-Student Dynamics and Student Outcomes in Professional Undergraduate Courses Journal of Engineering Education Transformations (JEET) SCOPUS January 2026

85 RANSEC: Hybrid Ensemble Learning-based Secure Approach for Ransomware Detection in Cyber-Physical Defence Systems Journal of Applied Science and Technology Trends SCOPUS,ESCI January 2026

86 Enhanced Quantum-Inspired Metaheuristic Framework for Federated Trust Management and Blockchain-Enabled Privacy in Large-Scale Internet of Vehicles IEEE Transactions on Consumer Electronics SCI/SCIE,SCOPUS,UGC January 2026

87 ChitraVivran: Real-Time Attention-Based Hindi Image Captioning with Boosted Contextual Descriptors ACM Transactions on Asian and Low-Resource Language Information Processing SCI/SCIE,SCOPUS,UGC January 2026

88 GLoHi-Cap: Gated Multimodal Fusion with Spatial Object Localization for Hindi Image Captioning 2025 IEEE International Conference on Computer Vision and Machine Intelligence (CVMI) SCOPUS January 2026

89 QFTN: A Quantum■Inspired Federated Trust Negotiation Framework for Secure Data Exchange in SECURITY AND PRIVACY ESCI,UGC January 2026

90 Enhancing Sustainability in Intelligent Transportation Systems with Machine Learning-Based Misbehavior Detection Lecture Notes in Mechanical Engineering SCOPUS January 2026

91 ADVANCING INNOVATION AND SUSTAINABILITY IN STEM EDUCATION: THE IMPACT OF VIRTUAL WORK ENVIRONMENTS ON STUDENT ENGAGEMENT AND DIGITAL EQUITY Asian And Pacific Economic Review ABDC January 2026

92 Mind Over Machine: Understanding Engineers' AI Opportunity and Risk Perceptions through Psychological Capital Journal of Engineering Education Transformations SCOPUS,UGC January 2026

93 Flipping the Classroom with AI: Student Perceptions and Learning Outcomes of Collaborative Learning Environment in Undergraduate Professional Courses MSW Management SCOPUS,UGC January 2026

94 Strengths, weaknesses, opportunities, and threats of smart technology in sustainable development Handbook on Integrating Smart Technologies for Sustainable Development SCOPUS January 2026

95 A Federated Learning and Explainable AI Framework for Privacy-Preserving Brain Tumor Diagnosis Using Multi-Institutional MRI Data IEEE Access SCI/SCIE,SCOPUS,UGC December 2026

96 Multi-constraint smart UAV healthcare transportation path using imperial competition algorithm for smart cities Discover Internet of Things SCOPUS,DBLP,UGC December 2025

97 Decision tree for severity assessment of neurodegenerative diseases using possibility approach and gait dynamics Scientific Reports SCI/SCIE,SCOPUS,UGC December 2025

98 Enabling scalable single-cell transcriptomic analysis through distributed computing with Apache spark Scientific Reports SCI/SCIE,SCOPUS,UGC December 2025

99 Multimodal characterization of an aldimine-1,2,3-triazole as cerium(III) sensor: spectroscopic, theoretical, and in silico study Polyhedron SCI/SCIE,SCOPUS,UGC December 2025

100 PRIVIUM: A differentiated privacy-privilege model for user security and safety in the metaverse Computers & Security SCI/SCIE,SCOPUS,UGC December 2025

101 Behavioral analysis of organic latent heat energy storage materials in a packed bed assisted with solar water heating system during post-charging phase Thermal Science and Engineering Progress SCOPUS,UGC December 2025

102 Hyperbolic graph autoencoder-based functional protein network analysis for preserving edible biodiversity in endangered food species Discover Food SCOPUS,ESCI,UGC December 2025

103 Improved remaining useful life prediction of lithium-ion batteries using novel hybrid algorithm for enhanced accuracy Journal of the Chinese Institute of Engineers SCI/SCIE,UGC December 2025

104 EXPLORING HOW HOTEL DESIGN, LOCATION, AND PERSONALIZED SERVICES DRIVE CUSTOMER REPURCHASE INTENTIONS IN JAMMU AND KASHMIR Geojournal of Tourism and Geosites SCOPUS,UGC December 2025

105 A Comprehensive Deep Learning Framework for Multimodal Cyberbullying Detection 2025 6th International Conference on IoT Based Control Networks and Intelligent Systems (ICICNIS) SCOPUS December 2025

106 Understanding Brand Engagement Through Gamification in Metaverse Environments: Insights from Urban North India 2025 7th International Symposium on Advanced Electrical and Communication Technologies (ISAECT) SCOPUS December 2025

107 Smart Wearable Antennas for Industrial Worker Safety and Health Monitoring IEEE 2nd International Conference on Intelligent Algorithms for Computational Intelligence Systems (IACIS) SCOPUS November 2025

108 Butylated Hydroxy Anisole-Based 1,2,3-Triazole Probe for Fluorescent Recognition of Cu(II), Fe(III), with Masked Sensing of Ce(III) Journal of Fluorescence SCI/SCIE,SCOPUS,UGC November 2025

109 A Blockchain■Empowered Trust Management System for Collaborative Services in Sustainable Smart Cities Transactions on Emerging Telecommunications Technologies SCI/SCIE,SCOPUS,DBLP,UGC November 2025

110 Toward a sustainable future: a computational intelligence fusion framework of color and darknet features for the classification of crop leaf diseases Mathematical Computing and Sustainability UGC,SCOPUS,SCI/BKSCI November 2025

111 Historical Evolution and Technological Advancements in Biomedical Imaging Biomedical Imaging Technology: Signal Processing Strategies and Innovations SCOPUS November 2025

112 Understanding Higher Education Teachers' Perceptions and Attitudes Towards MOOCs for Professional Development: A Scale Validation and Predictive Study Open Praxis ESCI,UGC November 2025

113 Business Education: Updating with Artificial Intelligence Transforming Business Education through Artificial Intelligence SCOPUS November 2025

114 Multimodal Imaging: Combining Molecular and Optical Approaches Biomedical Imaging Technology UGC,SCOPUS November 2025

115 A Performance and Usability Evaluation of Leading Big Data Visualization Tools 2025 International Conference on Innovations and Emerging Technologies In AI & Communication Systems (IETACS) SCOPUS November 2025

116 Biotechnical Stabilization of Marginal Soils Using Willow Roots as Natural Reinforcement Transportation Infrastructure Geotechnology SCOPUS,ESCI,UGC October 2025

117 Machine learning in prolactinoma detection: a systematic review and meta analysis of diagnostic innovations Discover Applied Sciences SCOPUS,ESCI,UGC October 2025

118 A Nano-Scale Quantum-dot Multiplexer Architecture for Logic Units in Internet-of-Things Healthcare Systems Nano Communication Networks SCI/SCIE,SCOPUS,UGC October 2025

119 Energy-efficient design of priority encoder-based median filter in QCA for impulse noise reduction The Journal of Supercomputing SCI/SCIE,SCOPUS,UGC October 2025

120 Security Solutions for Smart Cities Using Digital Twin Driving Innovation through AI and Digital Twin for 6G Powered Sustainable Ultra Smart Cities SCOPUS October 2025

121 Role of AI and Digital Twin in Industry 5.0 6G Urban Innovation SCOPUS October 2025

122 Optimized artificial neural networks for breast cancer diagnosis prediction Discover Applied Sciences SCOPUS,ESCI,UGC October 2025

123 ICFND: Integrated Classifier Approach to Fake News Detection Using Multiple Algorithms Security, Privacy and Data Analytics SCOPUS October 2025

124 Deep feature fusion for melanoma detection using ResNet-VGG networks with attention mechanism PeerJ Computer Science SCI/SCIE,SCOPUS,ESCI,UGC October 2025

125 Behavioural Detection of Ransomware and a Comprehensive Approach to Ransomware Prevention IEEE Communications Standards Magazine SCOPUS,DBLP,UGC October 2025

126 Synthesis and evaluation of 1,2,3-triazole for selective Pb(II) detection and cytotoxic effect on HepG2 Cancer cells Spectrochimica Acta - Part A: Molecular and Biomolecular Spectroscopy SCI/SCIE,SCOPUS,UGC October 2025

127 Smart solutions to a sustainable future Mathematical Computing and Sustainability SCOPUS October 2025

128 Ethical issues in intelligent systems for sustainability Mathematical Computing and Sustainability SCOPUS October 2025

129 Analysis of the drug resistance level of malaria disease: a fractional-order model Epidemiologic Methods SCOPUS,UGC October 2025

130 Causal Inference-Based Analytics Model for SLA Violation Prediction in Cloud 2025 2nd International Conference on Computational Intelligence and Computing Applications (ICCICA) SCOPUS October 2025

131 Cloud-Based Predictive Analytics for Hospital Resource Optimization 2025 2nd International Conference on Computational Intelligence and Computing Applications (ICCICA) SCOPUS October 2025

132 Data Space Privacy Model with Federated Learning Technique for Securing IoT Communications in Autonomous Marine Vehicles Journal of Intelligent & Robotic Systems SCI/SCIE,SCOPUS,DBLP,UGC September 2025

133 Design and Analysis of Antireflection Coatings for Silicon Solar Cells using Copper-Nanoparticles Journal of Scientific Research DBLP,AHCI,ABDC September 2025

134 Smart Patient Monitoring using Wearable Devices: Applications and Future Scope Driving Innovation through AI and Digital Twin for 6G Powered Sustainable Ultra Smart Cities SCOPUS September 2025

135 Telemedicine and remote patient consultations in the metaverse Metaverse in the Healthcare Industry: Potential Applications, Tools, and Techniques SCOPUS September 2025

136 Artificial intelligence-driven diagnostics and treatment planning in virtual environments Metaverse in the Healthcare Industry: Potential Applications, Tools, and Techniques SCOPUS September 2025

137 Enhancing digital preservation of Indian art heritage through fusion based deep learning CBIR system NPJ HERITAGE SCIENCE SCI/SCIE,SCOPUS,UGC September 2025

138 Sectoral Applications of XAI in Healthcare Digital Transformation and XAI in Healthcare SCOPUS August 2025

139 Performance Evaluation of Concrete with Varying Proportions of Marble Dust as Partial Cement Substitute Structural Integrity and Interactions of Materials in Civil Engineering Structures SCOPUS August 2025

140 Artificial intelligence-based prediction system for diagnosis of cancer diseases: a systematic review Soft Computing SCI/SCIE,SCOPUS,UGC August 2025

141 Cyber-Physical Collaborative Defense Framework Using Artificial Intelligence for Cross-Domain Attacks in Power Systems IEEE Communications Standards Magazine SCOPUS,DBLP,UGC August 2025

142 Compact semi-flexible X/K/Ka band MIMO antenna for 5G IoT in healthcare applications Journal of Electromagnetic Waves and Applications SCI/SCIE,SCOPUS,UGC August 2025

143 Economizing Large Language Model Training and Alignment with Human Values through Cost Effective Architectures and Transfer Learning Techniques Textual Intelligence SCOPUS August 2025

144 Multidimensional Impacts of Generative AI and an In■Depth Analysis of LLMs with Their Expanding Horizons in Technology and Society Textual Intelligence SCOPUS August 2025

145 Navigating the Generative AI Project Ecosystem with a Focus on Addressing Data Architecture Complexities and Strategic Model Selection for Optimal Outcomes Textual Intelligence SCOPUS August 2025

146 Multinational Collaborations and Innovation Digital Transformation and XAI in Healthcare SCOPUS August 2025

147 Assessing the Perceptions of Students' and Teachers' Towards Blended Learning and Its Effectiveness on The Learning Performance of Students: A Case Study in an Indian Higher Education Institution International Journal on E-Learning UGC,SCOPUS August 2025

148 Deep Learning Model for Prediction of Fall-Risk Using Gait Biomarkers in Geriatric Population 2025 2nd International Conference on Intelligent Algorithms for Computational Intelligence Systems (IACIS) SCOPUS August 2025

149 Ris-assisted integrated sensing and communication: applications, challenges and usecase scenario Discover Applied Sciences SCOPUS,ESCI,UGC July 2025

150 Self-adaptive evolutionary neural networks for high-precision short-term electric load forecasting Scientific Reports SCI/SCIE,SCOPUS,UGC July 2025

151 Artificial intelligence-augmented smart grid architecture for cyber intrusion detection and mitigation in electric vehicle charging infrastructure Scientific Reports SCI/SCIE,SCOPUS,UGC July 2025

152 Synergizing advanced algorithm of explainable artificial intelligence with hybrid model for enhanced brain tumor detection in healthcare Scientific Reports SCI/SCIE,SCOPUS,UGC July 2025

153 Enhancing engineering student engagement and learning outcomes through WebVR and wearable sensor integration with immersive learning Discover Sustainability SCOPUS,ESCI,UGC July 2025

154 Light-GBM based minority oversampling model using biomedical data analysis for breast cancer classification Discover Applied Sciences SCOPUS,ESCI,UGC July 2025

155 Explainable multi-view transformer framework with mutual learning for precision breast cancer pathology image classification Frontiers in Oncology SCI/SCIE,SCOPUS,UGC July 2025

156 Enhancing Heart Risk Prediction: A Synergistic Approach of Fuzzy Logic and Machine Learning Data Processing and Networking SCOPUS,EI ENGINEERING INDEX July 2025

157 Edge-aware multisensor brain image fusion via guided filtering in Laplacian domain Discover Artificial Intelligence SCOPUS,UGC July 2025

158 A new fault-tolerance majority voter circuit for quantum-based nano-scale digital systems Journal of Computational Electronics SCI/SCIE,SCOPUS,UGC July 2025

159 Blockchain aware game theory-based medical data sharing scheme Healthcare Frontiers in the Metaverse UGC,SCOPUS July 2025

160 Intelligent medical report extraction and generation model for smart healthcare services Healthcare Frontiers in the Metaverse UGC,SCOPUS July 2025

CRIE - Model Institute Of Engineering And Technology

Centre for Research, Innovation & Entrepreneurship

- CRIE Website

Overview

The Center for Research, Innovation & Entrepreneurship (CRIE) at MIET was inaugurated on April 10, 2019, by Prof. Manoj K. Dhar, Vice Chancellor of the University of Jammu. This initiative offers students hands-on experience with real-world projects in emerging fields such as Artificial Intelligence, Deep Learning, IoT, Cloud Computing, and Robotic Process Automation. Operating on an internship-based model, selected students collaborate on projects under the guidance of expert faculty mentors, gaining practical skills, filing patents, and publishing research papers. It encourages interdisciplinary teamwork, bringing students from various departments together to innovate. Prof. Ankur Gupta, Director of MIET, leads as the Chief Mentor, supported by faculty mentors Prof. Sahil Sawhney, Dr. Suhaib Ahmed, and Mr. Karan Khajuria. Currently, more than 20 students are actively engaged in pioneering research and development through CRIE.

Facilities and Resources

CRIE is equipped with state-of-the-art facilities to support its initiatives. Students from Model Academy School and Activity Higher Secondary School have explored CRIE, witnessing firsthand how cutting-edge technologies are utilized in research and innovation.

Collaborations and Achievements

CRIE has established collaborations with industry partners and academic institutions to enhance its research capabilities and entrepreneurial support. The center has been instrumental in incubating IT products and filing patents, reflecting its commitment to innovation and practical application of research.

Objectives

- To promote innovation in applied AI technologies.

- To enhance education and awareness in AI across various fields.

- To collaborate with industries for AI-driven solutions.

- To conduct research in AI for societal betterment.

- To provide consultation and advice on AI applications.

Startups Summits

Jk Startup Conclave

The Jammu Kashmir Startup Conclave 2024, hosted by MIET in collaboration with FICCI FLO JKL on November 8th, celebrated the entrepreneurial spirit and innovation in the region. The event featured esteemed speakers, including industry leaders and senior government officials, who shared valuable insights on building and scaling startups. Early-stage startups received over Rs. 2.5 lakhs in funding, while the Elevator Pitch Competition attracted 500+ entries, showcasing exceptional talent and creativity. The conclave provided a dynamic platform for networking, mentorship, and collaboration, fostering growth, learning, and empowerment for aspiring entrepreneurs in Jammu and Kashmir.

SEED

The SEED (Startup Ecosystem for Entrepreneurial Development) initiative at MIET Jammu is a comprehensive program designed to foster innovation and support aspiring entrepreneurs. It provides mentorship from industry experts, access to venture capital, networking with investors, and collaboration opportunities. SEED also organizes workshops, seminars, and boot camps to equip startups with essential skills for growth and scalability. As a key part of MIET's mission, the initiative plays a vital role in promoting entrepreneurship, strengthening the local economy, and nurturing a thriving startup culture in the region.

UDAY

The UDAY Summit, organized by MIET Jammu, is a flagship event promoting entrepreneurship, innovation, and business growth. It unites entrepreneurs, industry leaders, investors, and academicians to explore startup opportunities. The summit features keynote speeches, panel discussions, startup pitching sessions, and workshops on strategy and funding. It also provides networking opportunities, connecting startups with mentors, experts, and government bodies. Through this initiative, MIET

strengthens Jammu and Kashmir’s startup ecosystem, empowering young innovators and driving economic and technological advancement.

UltraTech Centre of Excellence

Overview

Key aspects of the UltraTech CoE at MIET:

- Focus on advanced materials: The CoE features models showcasing various building materials, including Ready-Mix Concrete (RMC), advanced concrete and cement products, tiling solutions, chemical waterproofing, and new construction materials.

- Educational and technical support: The CoE provides educational materials and technical expertise to the civil engineering community.

- Technical events and training: MIET organizes technical seminars, workshops, conferences, and training programs under the CoE to support the region’s civil engineering professionals.

- Sustainability and UN SDGs: The CoE emphasizes the importance of adopting sustainable practices in construction, aligned with the United Nations Sustainable Development Goals (UN SDGs).

- Research and development: MIET actively encourages faculty and students to engage in research in emerging fields of construction technology, including the establishment of an Indian Concrete Institute (ICI) student chapter.

- Industry collaboration: The CoE fosters collaboration between industry leaders like UltraTech and academic institutions like MIET to advance knowledge and innovation in the construction sector.
